ROADMAP

GENERAL

I. Selection of airlines for frequent flyer cards

Administration   The setting is automatic and cannot be set administratively.   ⚙

Description „ID - 11942":

The selection of airlines that can be chosen in the traveler profile has been updated and airlines that cannot be booked or no longer exist have been removed.

GENERAL

II. Travel policy alert (1/2)

Administration   The setting is automatic and cannot be set administratively.   ⚙

Description „ID - 11728":

With the appropriate travel management authorization, you can now also find the "travel policy alert" administration page in new layout. To do this, open the following new tile:

Travel policy alert

< Back					Close company management ✖
Manage company ❯ Travel policy alert					
Showing 0 to 0 of 0 entries					Search
Title ▲	Itinerary ▲	Category ▲	Traffic light ▲	Price from ▲	Price to ▲
		No matching records found			
				History	Add

GENERAL

II. Travel policy alert (2/2)

Administration   The setting is automatic and cannot be set administratively.

This change only affects systems that previously had this function in old layout.

GENERAL

III. Amadeus NDC [X] added to order accounting

Administration	The setting is automatic and cannot be set administratively.	⚙

Description „ID - 12693":

In the order accounting, all processes are transparent and clearly arranged and according to the selected month/quarter/year allocated.

In addition, bookings via the Amadeus NDC [X] interface are now also included:

Manage company ❯ Order accounting

Date	Dezember ⌄	Show		Sum as CSV	Details as CSV

All orders	290	Online ⇒ offline	3	Accounting with Paysoft	0	NDC booking	6
Without booking	240	PNR queue read ⇒ offline	0	Accounting via AGM	0	British Airways	0

GENERAL

IV. Additions to standard report booking overview all and train

Administration   The setting is automatic and cannot be set administratively.   ⚙

Description „ID - 12750":

As of now the country of departure and arrival will also be displayed in the following standard reports:

- Booking overview train by booking date

- Booking overview train by travel date

- Booking overview all by booking date

- Booking overview all by travel date

GENERAL

V. Display of CO$_2$-values improved (1/3)

Administration   The setting is automatic and cannot be set administratively.
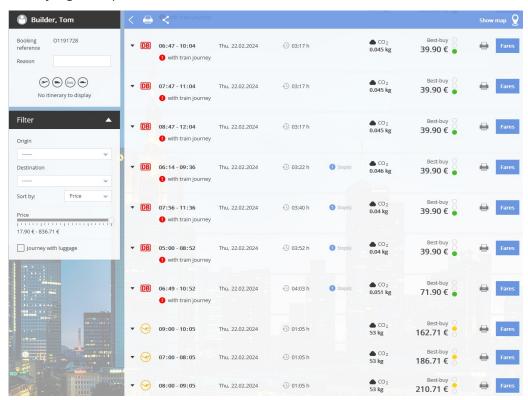

Description „ID - 12594":

In relation to travel the topic of sustainability becomes increasingly important.

The carbon footprint is now shown directly in the result lists and enables a better comparability (e.g. train and flight). The previous variable unit (gram, kilogram or ton) is adapted uniformly to kilograms.
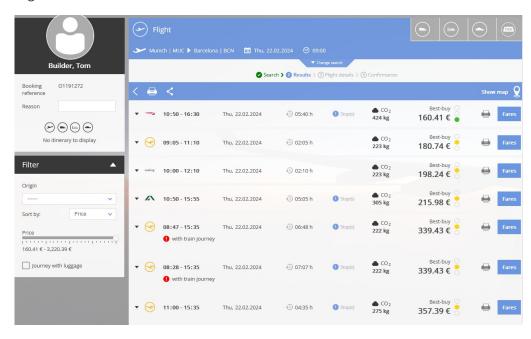

Railway/flight comparison:

GENERAL

V. Display of CO$_2$ values improved (2/3)

Administration   The setting is automatic and cannot be set administratively.

Flight:

GENERAL

V. Display of CO$_2$ values improved (3/3)

Administration	The setting is automatic and cannot be set administratively.	⚙

Railway:

With this release the display of the carbon footprint will be activated by default in all systems.

RAIL

I. Class from DB-Bahncard not automatically preselected with other railway providers

Administration   The setting is automatic and cannot be set administratively.   ⚙

Description „ID - 12546":

If a traveler has a DB-Bahncard in their profile, the booking class will only be the same as the pre-assigned Bahncard class if Deutsche Bahn is the provider. If other rail providers such as ÖBB are inquired, the DB-Bahncard class will not be preselected.

RAIL

II. Identification of rail connections with different travel dates

Administration	The setting is automatic and cannot be set administratively.	⚙

Description „ID - 12583":

For certain rail connections, such as direct connections that only run once a day, optional results that differ from the requested date are displayed.

These results are now marked more clearly.

FLIGHT

I. Strong Customer Authentication (SCA) for flight bookings via travelfusion

Administration   If you want to use this functionality please get in touch with your onesto contact.   ⚙

Description „ID - 12491":

Flights via travelfusion can also be paid with a personal credit card such as Visa or MasterCard if an AirPlus or AMEX BTA corporate credit card is not available. As of now, activation of Strong Customer Authentication (SCA) / 3D Secure (chargeable) is mandatory for payments.
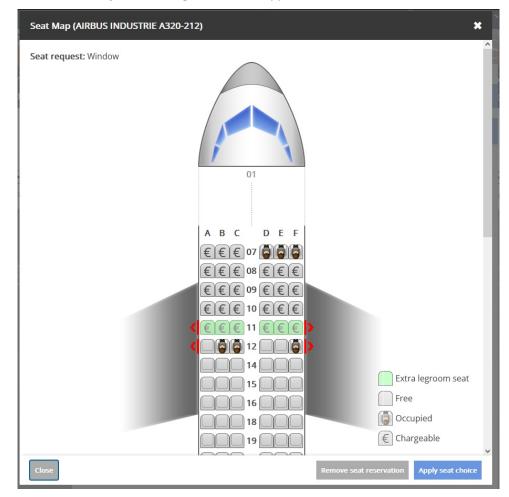

FLIGHT

II. Seat map – display of seats with more legroom

Administration   The setting is automatic and cannot be set administratively. ⚙

Description „ID - 11555":

As of now, seats with more legroom will be highlighted in color directly in the overview, if the reservation system provides this information. Currently the reservation systems Amadeus, Travelport, Farelogix as well as the direct interfaces to easyJet, Eurowings and Iberia support this feature.

HOTEL

I. CO_2-values for hotels (1/2)

**Administration**   The setting is automatic and cannot be set administratively. ⚙

Description „ID - 11913":

The CO_2 emissions are now also shown for hotel accommodations. In the hotel results list, as well as during the booking process, on the itinerary and in the standard reports, the CO_2 emissions are displayed depending on the hotel provider used. Currently CRC and DERHotel are supporting this.

List of results:

HOTEL

I. CO$_2$-values for hotels (2/2)

| Administration | The setting is automatic and cannot be set administratively. | ⚙ |

Online itinerary:

Provider:	●●● Corporate Rates Club (CRC)
Reservation number:	
CO2 emission:	6.82 kg

PDF of itinerary:

| Reservation number: | |
| CO2 emission: | 6.82 kg |

onesto

HOTEL

II. Standard report hotel – expansion by CO_2-information

Administration   The setting is automatic and cannot be set administratively.   ⚙

Description „ID - 11921":

The onesto standard reports "booking overview hotel by booking date" or "booking overview hotel by travel date" are expanded to include the "CO_2 [kg]" column.

Depending on the hotel provider used, the CO_2 values are provided for new bookings. In the first step these providers are CRC and DERHotel. As soon as other providers will also make CO_2 values available, these will be displayed in the report for new bookings.

onesto

HOTEL

III. New hotel provider Go Global Travel

| Administration	If you want to use this functionality please get in touch with your onesto contact.	⚙

Description „ID - 12607":

We are pleased to have a new partner in the hotel sector with Go Global Travel.

Go Global Travel offers over 1,000,000 hotels and apartments in more than 70,000 destinations worldwide.

Go Global Travel usually sends cost reimbursements to the booked hotels and then invoice these directly to the customer/company.

The interface will be available to you after successful certification in Q1/Q2 2024.

RENTAL CAR

I. Car pool administration

Administration	The setting is automatic and cannot be set administratively.	⚙

Description „ID - 11730":

As of now you can also find the car pool administration in new layout. To do this, open the following new tile:

Car pool

If you have general questions about onesto car pool, please get in touch with your onesto contact.

This change only affects systems that previously had this function in old layout.

RENTAL CAR

II. Layout adjustment for preliminary selection of car rental / car pool

**Administration**   If you want to use this functionality please get in touch with your onesto contact.   ⚙

Description „ID - 12707":

The pre-selection between rental cars and onesto car pool has been revised and now also shows a symbol and a text description:

	Car		
onesto	Search carpool vehicle		Continue
	Search rental car		Continue

RENTAL CAR

III. Car pool - display alternatives

Administration   If you want to use this functionality please get in touch with your onesto contact. ⚙

Description „ID - 12034":

When requesting fleet vehicles via onesto car pool, this new function can be activated:

If there is no fleet vehicle available for a requested time, alternative times can now be displayed and booked.
These alternatives are marked with a corresponding note.
Depending on the flexibility of the booking time, the user can decide to use such an alternative or switch to an external rental car reservation.

This function is available in new layout.

ROADMAP

I. New distribution system of Deutsche Bahn

Background
Deutsche Bahn's existing distribution systems (BIBE + NVS) ran in parallel at a high maintenance effort. The new platform creates a comprehensive system with a central interface and better functions. In 2023, the public website of Deutsche Bahn for leisure tickets was migrated and new apps like the DB Navigator followed. In 2024 new interfaces will be available for business trips rolled out for Deutsche Bahn's new sales system. In cooperation with Deutsche Bahn onesto currently creates new interfaces.

What will change?
There will still be two options for booking Deutsche Bahn tickets via onesto:

bahn.business Portal
• Replaces the BIBE solution
• Booking in DB booking masks

PST interface
• Replaces the NVS interface
• Full integration in onesto
• More functions, e.g. traffic light settings, graphical seat map

Bookings and tickets in both options
• Digital ticket as PDF
• Mobile ticket
• Bahncard Business 25/50 can be booked
• Bahncard 100 can be booked

• Use of company credit cards
• Ticket and invoice are separate
• Collect BahnBonus points
• DB order number has 20 digits

Schedule and next steps
Currently: Programming of interfaces in onesto is already in progress
06.2024:   The first pilot customers are switched from BIBE to the bahn.business portal
07.2024:   The first pilot customers are switched from NVS to PST
07./08.2024:   Switching of all BIBE and NVS customers to the new interfaces
10.2024:   Technical shutdown BIBE and NVS

Your onesto contact will inform you about this. In addition, rail BMIS customers will be contacted directly by the responsible Deutsche Bahn Key Account Manager.

onesto

ROADMAP

II. Developments with partners

ÖBB: Expansion Pullman Coach / Couchette Coach
The connection to ÖBB will be expanded so that places in Pullman Coach / Couchette Coach on the ÖBB night trains (Nightjet) will also be bookable via onesto. Also the possibility of reserving places in special areas is being checked so that special zones such as e.g. quiet zones can also be booked.

benerail: New interface
benerail is switching to a new interface. This will also be supported by onesto. In addition to Eurostar trains and the countries France, Belgium, Netherlands, Luxembourg and Denmark, benerail can already be used to book main routes in Switzerland, Italy, Sweden, Hungary, Slovakia and the Czech Republic. With the new interface the service expands to Spain.

Trainline: Pilot Customer
We are expecting the first pilot customers for Trainline to book in the UK. An expansion to the Swiss Railways (SBB) is planned and other countries are possible upon customer request.

HRS: Smarthotels
Since online check-in is becoming more and more relevant in the hotel industry, we will integrate the "Smarthotels" feature from HRS so that check-in can take place via onesto2go.

refundrebel: further railway providers
The inclusion of additional rail providers (benerail, ÖBB and Trainline) is being implemented. The bookings are then automatically transferred to refundrebel if refundrebel is activated for railway.

ROADMAP

III. Developments on and in our system

Dashboard
We are developing a new onesto dashboard that will graphically display the following information:

- Number of transactions
- Number of bookings
- Sales
- CO2 emissions (flight, train, hotel)

- Online vs. offline bookings
- Violation of travel policy
- Advance booking period
- Travel duration

Integration of additional administrative areas into new layout
In order to improve handling for administrators, we are constantly updating existing administrative functionalities in new layout.

Conversion to new layout - deactivation of old layout
New functionalities and interfaces are already provided today only for new layout (e.g. benerail, ÖBB, Trainline, ParkAero). We therefore recommend for all customers who are still using old layout a transition plan to new layout as soon as possible. Old layout will be switched off next year at the latest.
