---	----

CAR RENTAL

I. Booking Process Car Pool Administration	12
--	----

GENERAL

I. Calendar Sync / Calendar Server

Functionality Area	Calendar
New Functionality	Calendar Sync

Description:

onesto's „calendar server“ allows the user to automatically synchronize the onesto booked itineraries in the common calendar applications, like e.g. Outlook, iPhone or Android.

Saving the calendar files from the onesto booking confirmation is not needed anymore.

For the configuration of this functionality within your applications, please contact your internal IT department.

URLs of the servers:

<https://www.onesto.de/XXX/Calendar> (EN)

<https://www.onesto.de/XXX/Kalender> (DE)

(XXX = customer specific URL, used for opening onesto)

For the user's authentication, the respective onesto access data will be used.

GENERAL

II. Company Selection Hierarchy In Reporting / Statistics Module

Functionality Area	Reporting / Statistics
New Functionality	Company Selection Hierarchy

Description:

In the module Reporting / Statistics the selection of a company will be extended by a hierarchical display.

Booking Overview All
 This report delivers you the overview of all orders. You can filter the results according status, companies and cost accounting data (if available).

FLIGHT

I. Automatic Confirmation Flight Times Changes

Functionality Area	Flight Booking
New Functionality	Flight Times Changes

Description:

In case the travel agency is using the standard queue in onesto Agent for the automatic comparison of e.g. times changes (Amadeus, Galileo, Farelogix), the orders will automatically be updated and the traveller receives a new booking confirmation. Simultaneously, an information per e-mail to a defined recipient in the travel agency can be sent.

In the e-mail you can find the previous times, as well as the new status (time, flight number, etc).

FLIGHT

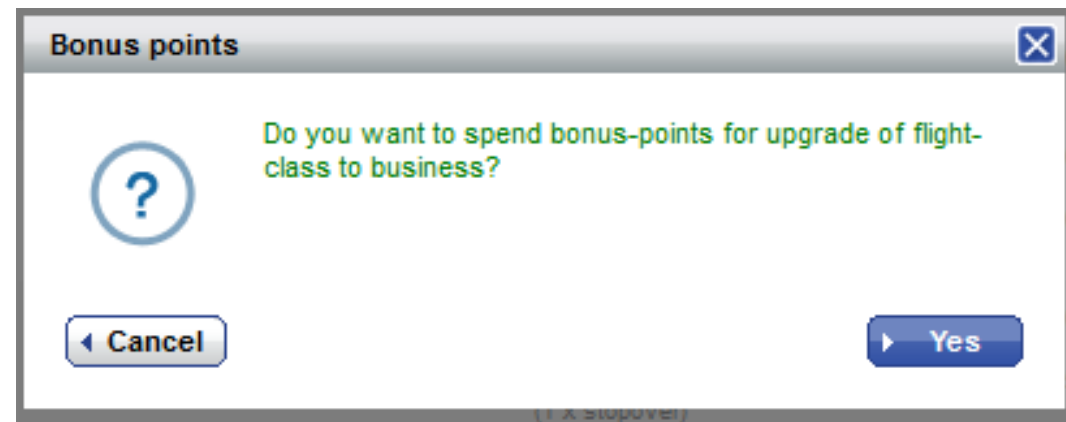

II. Extension Bonus Points

Functionality Area	Flight	
New Functionality	Supplementary Question To Redeem The Points	

Description:

Currently the user gets the question, if the available collected bonus points should be used for an upgrade, only during the first request in an order.

Starting with this extension, also during the change of a search request, using new travel data, the question will now appear.

FLIGHT

III. Chargeable Seats Booking For easyjet And Eurowings

Functionality Area

Flight

New Functionality

Chargeable Seats Booking For easyjet And Eurowings

Description:

Next to the previous possibilities, to book the easyjet and Eurowings free of charge seats, starting now it is also possible to book the chargeable seats of these two airlines.

FLIGHT

IV. Grouping More Travel Agency Flight Bookings To Quotations

Functionality Area	Flight Booking Quotation	
New Functionality	More Flights In A Quotation	

Description:

Currently, a quotation can only consist of one booking.

Starting with the new functionalities, it is now possible to group more bookings to more quotations.

In this way, it is possible to group several routings or different travel data to different quotations.

The user receives in Customer a corresponding view and can decide for one quotation.

Offer: Angebot ZWEI						Confirm all	Reject all

FLIGHT

V. Usage CLID

Functionality Area	Flight Booking
New Functionality	Transmission „CLID“

Description:

As soon as a company has contractually agreed special conditions with an airline, which can be included in a so-called „CLID“, it is now possible to save this code administratively and to take it over in the PNR of the booking.

FLIGHT

VI. Forwarding easyjet Info E-mails

Functionality Area	Flight
New Functionality	Forwarding easyjet Info E-mails

Description:

For many bookings, easyjet sends further information about the booked flights per e-mail.

These e-mails can now automatically be received by onesto and forwarded to the traveller.

In order to use this functionality, it is needed to set up the easyjet bookings via the onesto easyjet access.

For using this functionality, please contact your onesto contact person.

HOTEL

I. Import File Hotel Rates Upload Check

Functionality Area	Hotel
New Functionality	Import File Hotel Rates Upload Check

Description:

For the module „Hotel Rates Upload Check“, a csv import file is now available. This file can be imported in the system via onesto support.

CAR RENTAL

I. Booking Process Car Pool Administration

Functionality Area	Car Pool	
New Functionality	Display Available Cars	

Description:

During the booking of a pool car in the pool car administration, only really available cars will be offered for the selection. Therefore, a check of the date and time parameters entered in the search mask, will be performed. If these will be changed, the list of available cars can be updated, using the button „search for free cars“.
