GENERAL

I. AirPlus A.I.D.A. Changes from AirPlus To Account Number

Functionality Area	A.I.D.A
New Functionality	New Account Number

Description:

AirPlus changes the A.I.D.A. process.

Starting September, Airplus will change for the usage of A.I.D.A. the transmission parameter from AirPlus credit card number to account number.

The following product versions are offered:

- AirPlus A.I.D.A. Virtual Cards Classic – the classic version is an improved product of the known A.I.D.A. virtual cards, with new features and advantages
- AirPlus A.I.D.A. Virtual Cards for Travel Agencies – this version offers a virtual card, especially for travel agencies, in order to pay the travel services
- AirPlus A.I.D.A. Virtual Cards for Procurement – the virtual card in order to pay the purchase services

For the conversion to acount number or any other information, turn please to your AirPlus contact person. For the settings in onesto, please contact your onesto contact person.

GENERAL

II. Total Journey Price Calculation

Functionality Area	Itinerary
New Functionality	Total Journey Price Calculation

Description:

In the calculation of the total price (as long as this is activated), also non refundable amounts will be counted, as they belong to the total costs of a journey.

GENERAL

III. PSD 2 Rules Starting On 14th of September 2019 (3-D Secure Authentication)

Functionality Area	Booking Via Private Credit Card
New Functionality	3-D Secure Authentication

Description:

The new technical standards of the European Bank Supervision will apply, as per 14th of September 2019 (PSD 2). This should increase the security of online transactions and customer account accesses. A strong customer authentication is required hereto (SCA: Strong Customer Authentication).

onesto works together with all providers for a solution hereto. We currently assume, that all bookings are further possible, also after the 14th of September 2019. In case of problems with your card, contact your bank, please.

The decision, if an exception will be made or if the customer must perform an SCA is taken by the issuer (card issuer bank).

Company accounts are mainly not affected by the PSD 2.

GENERAL

IV. XML Data Export – Customization Status Cancel

Functionality Area	XML Data Export
New Functionality	Status <CANCEL> Customization

Description:

Previously, in the XML data export, the status <CANCEL> has been set on the value <1>, only if the function „Cancel itinerary" has been used in a certain journey.

The journey will now contain also the value <1>, if the corresponding means of travel have been separately cancelled within the order and no active mean of travel is present in the order anymore.

onesto

FLIGHT

I. Aer Lingus Via Interface

Functionality Area	Flight
New Functionality	Aer Lingus Via Webservice

Description:

Aer Lingus bookings will be covered in the future by the new, integrated online interface.

The conversion takes place automatically at a later stage, after a succesful airline acceptance.

FLIGHT

II. Travelfusion Interface

Functionality Area	Flight
New Functionality	Travelfusion Interface

Description:

onesto now offers the possibility to connect various airlines via an interface to the airline content aggregator Travelfusion.

This interface offers a multitude of airlines, which were so far not available via GDS or direct interfaces, especially in the area of Low Cost Airlines.

Through the integration of the interface, the bookings take place directly in the system of the respective airlines, the ticketing is performed directly by the airline.

The travel agency has access to all bookings performed via Travelfusion in onesto Agent. Next to bookings, it is also possible to perform cancellations.

For further questions to this subject, please contact your onesto contact person.

RAIL

I. Bahntix Seach For Ticket Machine

Functionality Area	Rail
New Functionality	Search For Ticket Machine Not Possible Anymore

Description:

Starting with the most actual version of the NVS interface, the search for machines for picking up the tickets at the railway station is no longer supported.

RAIL

II. Central BahnCard Order (1/2)

Functionality Area	Central BahnCard Order
New Functionality	BahnCard Order Via Authorized Persons

Description:

Starting with this new functionality, there is a possibility to order or to book online a BahnCard in a centralized way (e.g. via Travel Management and/or other authorized persons).

The BahnCard order / booking authorized users can get a new right hereto.

The BahnCard order / booking can be booked online or offline.

RAIL

II. Central BahnCard Order (2/2)

Functionality Area	Central BahnCard Order
New Functionality	BahnCard Order Via Authorized Persons

The order can be placed offline or online as booking, via BIBE respectively, via NVS, directly booked in onesto. It is also possible to realize this via Requests & Forms.

This new functionality is available for the NVS, as well as for the BIBE interface.

For these administrative settings, contact please your onesto contact person.

RENTAL CAR

I. Car Rental Sort By Price Across Categories

| Functionality Area	Car Rental Search
New Functionality	Sort By Price

Description:

Starting with this new functionality, it is now possible to search by price across categories. Independent of the category, the cheapest price, followed by the next prices in ascending order, will be displayed. The search functionality is available for onesto Customer, as well as for onesto2go.

A previously existing functionality consists of the price display by category, followed by a user active independent sorting via the „price" filter.

For this administrative setting, turn please to your onesto contact person.
