Release Note
2019.11
Content

GENERAL

I. Display Documents In Orders (1/2)

Functionality Area	Upload Documents
New Functionality	Assign Documents To Orders

Description:

Starting with this extension, customers who use the onesto documents management, e.g. to save receipts will get now the documents displayed according to the assignation.

The assignation follows automatically either afterwards or during the upload, per mean of travel (e.g. a rail ticket):
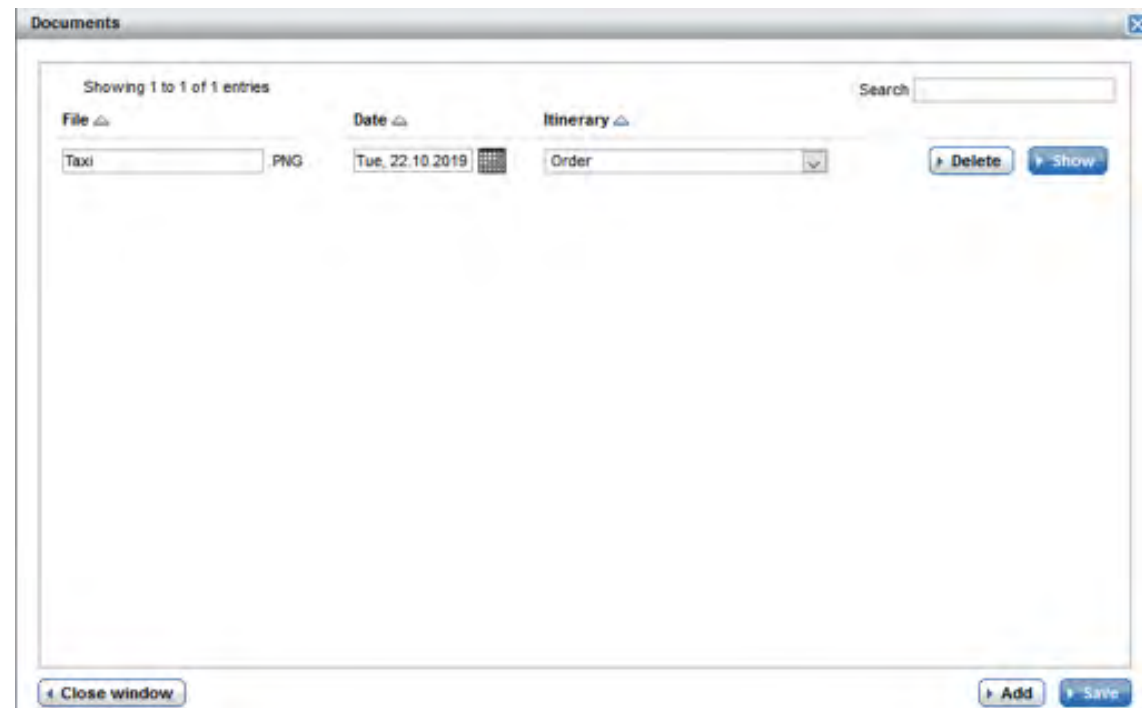

GENERAL

I. Display Documents In Orders (2/2)

Functionality Area	Upload Documents
New Functionality	Assign Documents To Orders

After the assignation took place, the documents will be displayed, easy to access, within the travel expense registration:

Not assigned documents remain under the category „Documents":

GENERAL

II. E-Mail Transmission Depending On Additional Data

Functionality Area	Notification Management
New Functionality	E-Mail Transmission Depending On Additional Data

Description:

As a supplementary trigger for the e-mail transmission via the notification management, a credit card additional field can now be defined, too.

If the user fills out the corresponding additional data field in the order, the transmission of the e-mail via the notification management will follow automatically.

onesto

GENERAL

III. Report Extension „Travel Policy Deviation"

Functionality Area	Reports
New Functionality	Report Extension

Description:

The standard report „Travel policy deviation" will be now extended by the column „Status", so that a sorting resp. a filter by the status (e.g. online booking, travel agency order, quotation, cancelled) can be done.

Please be informed that, this change will be available during November 2019.

GENERAL

IV. Approval E-Mail With Link and SSO (SAML 2.0)

Functionality Area	E-Mail For Approval
New Functionality	Link In The Approval E-Mail Leads To Direct Connection

Description:

Customers, who perform a general Single Sign On via SAML 2.0 are now also permitted to connect via SAML 2.0, when opening the system via an approval link. This means, for customers who use an active approval process, where the approver must connect to the onesto system, the user will now, starting with this extension, be automatically connected to the system.

GENERAL

V. Web Service Interface For Valid Additional Data Transmission

Functionality Area	Interfaces
New Functionality	Transmission Valid Additional Data

Description:

There is the possibility in onesto to check in the background, the additional data entered against a list of valid values. This additional data check avoids the saving of not valid data entered by the user in an order.

The allowed values can actually be uploaded as a file in onesto.

As alternative to a file upload, onesto offers now a webservice interface. Via this interface the customers can now transfer the valid values, too.

GENERAL

VI. Web Service Interface For POIs Transmission

Functionality Area	Interfaces
New Functionality	POIs Transmission

Description:

In onesto it is possible to set points of interest (POIs) / company locations for the radius search. These can be set either manually or via data file upload.

Starting with this release, there is a new possibility to automatically transmit the POIs from the customer side via a web service interface.

FLIGHT

I. Farelogix – Booking Luggage

Functionality Area	Flight
New Functionality	Booking Luggage

Description:

Via the Farelogix interface it is now possible to book a luggage for a certain fee. This is valid for the selection of a Lufthansa, Austrian and Swiss „light" fare, as well as for the Brussels Airlines „check and go" fare.

FLIGHT

II. British Airways Interface Upgrade

Functionality Area	Flight
New Functionality	British Airways Interface Upgrade

Description:

The direct interface to British Airways has been changed to the most actual version. This can be used, as soon as the certification through the airline is finalized.

FLIGHT

III. Prior Check On Possible Online Rebooking

Functionality Area	Flight Rebooking
New Functionality	Prior Check On Possible Online Rebooking

Description:

In order to simplify the rebooking process, a check will now take place in case of the direct interfaces, prior to the attempt for the online rebooking, if the wished fare is rebookable or not.

In case a rebooking is not possible, a corresponding advice will be displayed here. Rebookable rates will be accepted for the rebooking process without any advice.

RAIL

I. Seat Reservation For BahnCard 100 Owner

| Functionality Area	Seat Reservation
New Functionality	Seat Reservation For Free For BC100 Owners

Description:

In order to book a seat reservation free of charge, it is first necessary to save your BahnCard 100 in your traveller profile. The BahnCard will automatically be preselected during the search.

If you only reserve a seat and book no ticket, enter now your wished connection. After you select the relation and any price, set then the tick on „only seat reservation". In this way, you automatically come in the correct booking process for seat reservations free of charge.

This functionality stays at your disposal for BIBE, NVS and also via NVS in onesto2go. For the usage of BIBE within onesto2go, this functionality is unfortunately not offered via the Deutsche Bahn.

In case for a selected routing a price will be displayed, either the contingent for the BahnCard 100 is sold out or there is another reason why this is not possible. In such cases, please turn directly to Deutsche Bahn.

RAIL

II. Further External Rail Providers

Functionality Area	Rail
New Functionality	Further External Rail Providers

Description:

The list of external rail providers, which can be used as a jump over out of onesto to their website has been extended.

Now it is possible to connect also suppliers like „Abellio" and „bls" as a jump over out of onesto and the bookings take place directly on their websites.

HOTEL

I. Booking.com Interface Upgrade

Functionality Area	Hotel
New Functionality	Interface Upgrade

Description:

The direct interface to booking.com will be updated to the most actual version. This can be used, as soon as the certification at booking.com is finalized.

One of the most important new functionalities is a data transfer from booking.com to onesto, when changes are performed directly at booking.com. In this way, the changes will be visible also in onesto and the traveller has permanently an actual itinerary.

CAR RENTAL

I. Name Change Sixt MyDriver To Sixt Ride

Functionality Area	Car Rental
New Functionality	Name Changes To Sixt Ride

Description:

The supplier Sixt My Driver has changed the name now to Sixt Ride.

CAR RENTAL

II. Sixt – Extended Reduction Of Liability

Functionality Area	Car Rental
New Functionality	Extended Reduction Of Liability

Description:

It is now possible for the user, directly while booking a Sixt car rental to add also an extended reduction of the liability.
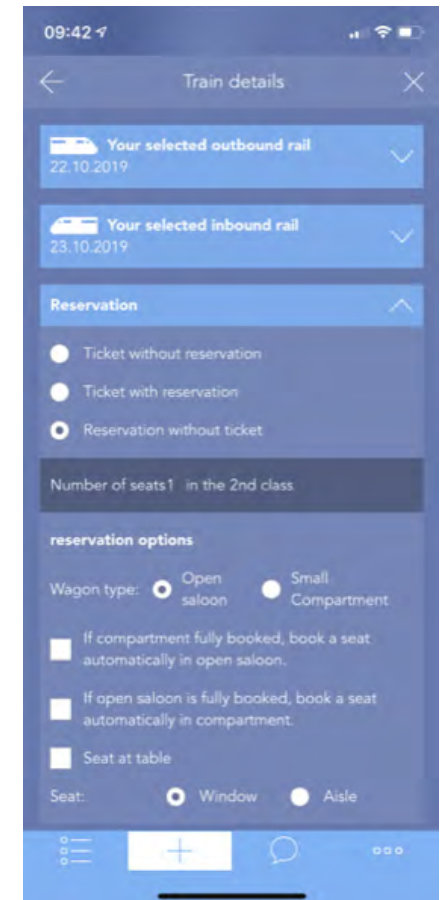

ONESTO2GO

I. „Only" Seat Reservation Via onesto2go

Functionality Area	Seat Reservation Via onesto2go
New Functionality	„Only" Seat Reservation Via onesto2go

Description:

Similar to the booking possibility within BIBE or NVS in onesto Customer, it is now also possible for BIBE customers to book „only" seat reservation via onesto2go.

If you reserve a seat without booking a ticket, enter the wished connection. After selecting a relation and a price, set the tick for „only seat reservation". You come now automatically in the correct booking process.

ONESTO2GO

II. Destination Takeover From The Last Booking

Functionality Area	onesto2go
New Functionality	Default Destination

Description:

As already known from the Customer application, the destination will now also be automatically taken over for futher bookings in onesto2go. In this way it is not necessary to retype it.

Example:

After a flight booking Dortmund – München - Dortmund a hotel booking will follow. The destination München is now already filled out at the hotel search.
