I. System Administration in new layout

Administration The setting is done automatically and cannot be set administratively.

ID 15417 

With the appropriate user-right it is now possible to switch directly from Customer Administration to the extended System Administration.

The screenshot shows a grid of 24 administrative functions. The 'onesto Administration' function is highlighted with a red border. The other functions are:

- Administration (old layout)
- Airline Corporate Bonus Program
- Amadeus Terminal
- Background Images
- Business trip destinations
- Car pool
- Colors
- Colors - onesto2go
- Current logged in users
- Custom reporting CO2 (headcounts upload)
- Dashboard
- Edit support page
- Edit user groups
- Error Overview
- FAQ
- FAQ Management
- Galileo Terminal
- Itineraryrequests
- Manage profiles
- Notification management
- Order accounting
- Reports / Statistics
- Select PremierInn Excel file
- Text-Manager
- Translate system texts
- Travel management hotel
- Travel policy alert
- User/traveller updater
- onesto Administration

II. Extension of the standard report "Advance Booking"

Administration The setting is done automatically and cannot be set administratively.

ID 14969 

The standard reports "Booking Overview All" and "Booking Overview by type of transport" have been extended with an additional column, "Advance Booking", which shows the number of days between the booking date and the travel date.

III. Sending the ics file directly after booking

Administration To use this function, please get in touch with your onesto contact.

ID 15683 

In addition to the known sending of ICS files as an email attachment together with the booking confirmation, it is now also possible to send only the calendar entry as an invitation immediately after booking the individual services.

I. DB Partner Interface (PST) - new travel management setting

Administration To use this function, please get in touch with your onesto contact.

ID 15765

For Deutsche Bahn bookings via the PST interface, this release introduces an enhancement to travel policy administration:

In addition to the existing option of allowing travel in 1st class from a defined travel time onwards, it is now also possible to permit 1st-class travel based on a price limit that references the 2nd-class fare.

A tariff is defined as the reference value that is available for the desired route.

In the following example, the "Flexpreis Business" in 2nd class (€249.80) serves as the reference; therefore, cheaper 1st-class fares, such as "Super Sparpreis", are permitted for booking.

II. DB Partner Interface (PST) - Transfer time as a search criterion

Administration The setting is done automatically and cannot be set administratively.

ID 14840 

For a train query via the PST interface, we now offer the option to specify a transfer time.

The screenshot shows the onesto Rail search interface. On the left, there is a user profile for 'Builder, Tom' with a booking reference 'O1224984'. The main search area is for a round trip from 'Origin' to 'Destination' with 'Stopover' and 'Return stopover' options. The 'Transfer time' dropdown is highlighted with a red box and set to '0 Minutes'. Other search parameters include 'Departure date' (Tue, 13.01.2026), 'Return date' (Tue, 13.01.2026), 'Departure time' (07 : 00), 'Return time' (17 : 00), 'Train type' (Standard search), 'Class' (2nd class), and 'Builder, Tom' (Date of birth, BahnCard, Use German D-Ticket). At the bottom, there are buttons for 'Back', 'Go to itinerary', 'BahnCard Business Calculator', 'Travel Agency request', 'Train schedule', and 'Book online'.

III. DB Partner Interface (PST) - Display of profile preferences in the seat map

Administration The setting is done automatically and cannot be set administratively.

ID 14712

The DB interfaces no longer consider seat preferences and work exclusively with seat assignment via the seat map—or with a random assignment if no seat is specifically selected.

With this enhancement, the seat preferences stored in the profile are now displayed in the seat map, allowing the traveller's preferences to be immediately visible when booking and enabling the selection of a suitable seat directly from the seat map.

IV. ÖBB – seat booking in preferred area

Administration The setting is done automatically and cannot be set administratively.

ID 16437

For bookings via the ÖBB interface, it is now possible to reserve seats in specific areas.

Depending on availability, train, and class, different zones are offered:

This includes, among others, bookings in the quiet or bicycle zones, as well as seats with a table or designated for passengers with disabilities.

Builder, Marlene

V. bahn.business – additional rail providers via bahn.business

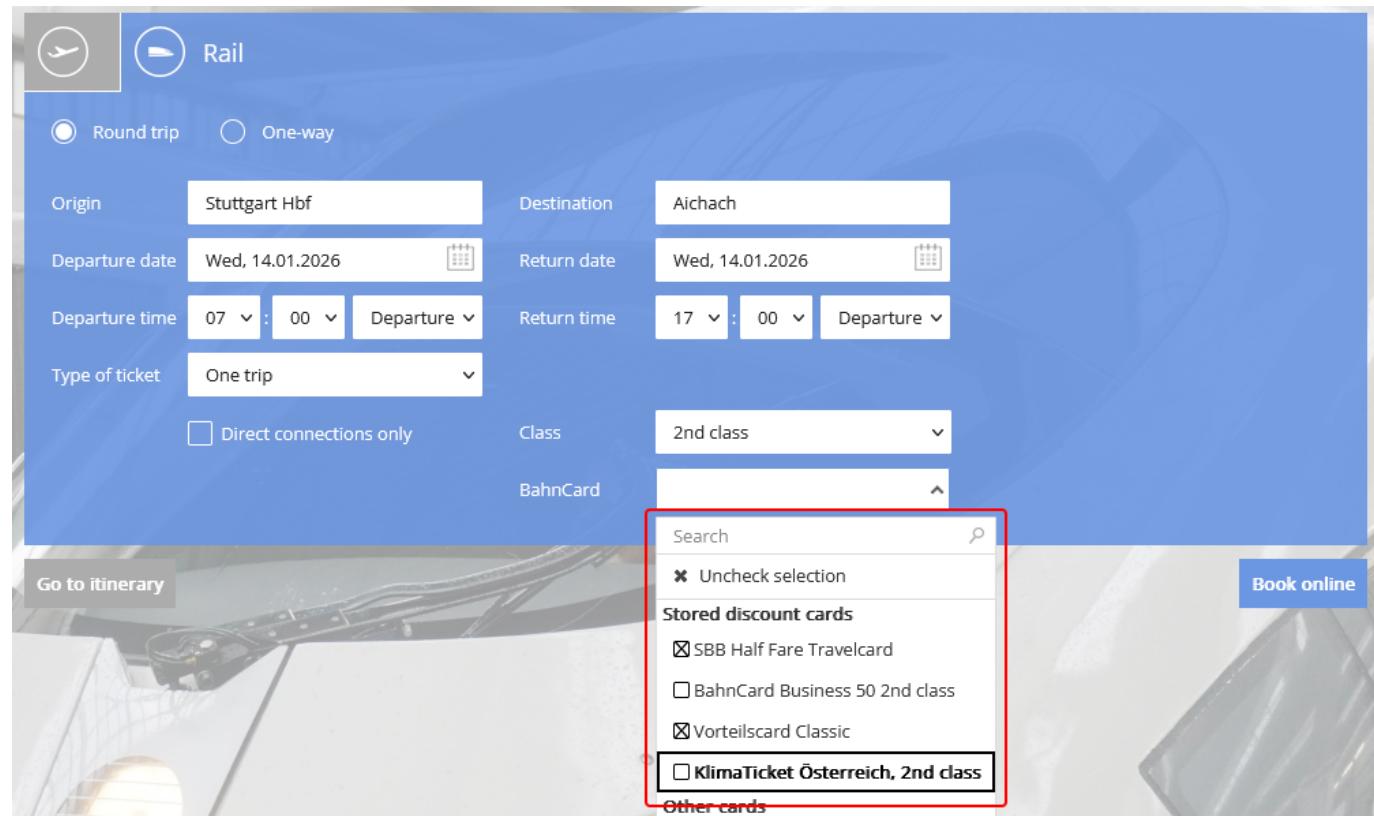

Administration The setting is done automatically and cannot be set administratively.

ID 15692 

The bahn.business portal of Deutsche Bahn will soon offer additional providers for international travel.

However, only one-way trips are available—neither all fare types nor corporate fares are supported. Round trips must be booked in two separate steps.

For providers such as SBB and ÖBB, the customer cards stored in the onesto traveller profile can be transmitted to the portal.

The screenshot shows the onesto travel portal's Rail booking interface. The search parameters are set for a one-way trip from Stuttgart Hbf to Aichach on Wednesday, 14.01.2026, at 07:00 Departure and 17:00 Return. The class is selected as 2nd class. A dropdown menu for 'BahnCard' is open, listing the following options:

- Search
- Uncheck selection
- Stored discount cards**
- SBB Half Fare Travelcard
- BahnCard Business 50 2nd class
- Vorteilscard Classic
- KlimaTicket Österreich, 2nd class**

Other cards

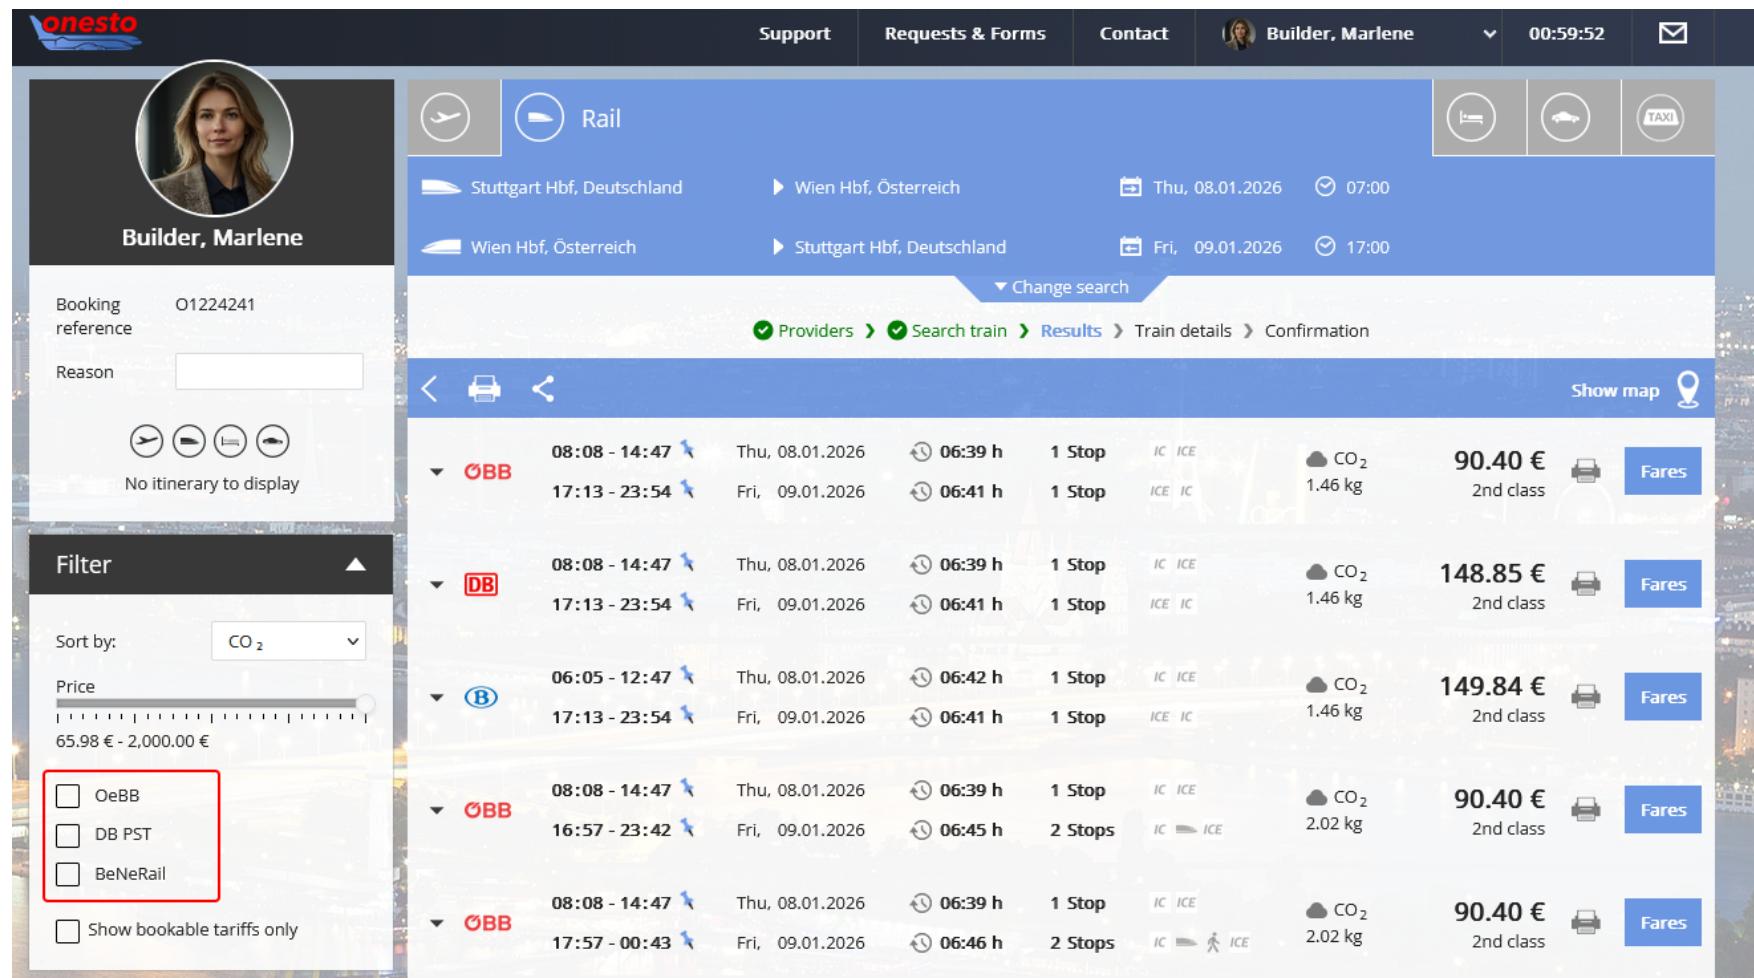

VI. Filter by provider in rail multi search

Administration The setting is done automatically and cannot be set administratively.

ID 14802 

With the rail multisearch, different train providers can be queried simultaneously to get an optimal overview of the best prices and connections across multiple routes.

When this feature is enabled, the search results can now be filtered by provider.

The screenshot shows the onesto Rail Multisearch interface. At the top, the search parameters are displayed: departure from Stuttgart Hbf, Deutschland to Wien Hbf, Österreich on Thursday, 08.01.2026 at 07:00, and return on Friday, 09.01.2026 at 17:00. The results are filtered by provider. The results table shows the following data:

Provider	Date	Time	Duration	Stops	Class	Price	CO ₂ Emissions
OeBB	Thu, 08.01.2026	08:08 - 14:47	06:39 h	1 Stop	IC ICE	90.40 €	1.46 kg
	Fri, 09.01.2026	17:13 - 23:54	06:41 h	1 Stop	ICE IC	2nd class	90.40 €
DB	Thu, 08.01.2026	08:08 - 14:47	06:39 h	1 Stop	IC ICE	148.85 €	1.46 kg
	Fri, 09.01.2026	17:13 - 23:54	06:41 h	1 Stop	ICE IC	2nd class	148.85 €
(B)	Thu, 08.01.2026	06:05 - 12:47	06:42 h	1 Stop	IC ICE	149.84 €	1.46 kg
	Fri, 09.01.2026	17:13 - 23:54	06:41 h	1 Stop	ICE IC	2nd class	149.84 €
ÖBB	Thu, 08.01.2026	08:08 - 14:47	06:39 h	1 Stop	IC ICE	90.40 €	2.02 kg
	Fri, 09.01.2026	16:57 - 23:42	06:45 h	2 Stops	IC ICE	2nd class	90.40 €
ÖBB	Thu, 08.01.2026	08:08 - 14:47	06:39 h	1 Stop	IC ICE	90.40 €	2.02 kg
	Fri, 09.01.2026	17:57 - 00:43	06:46 h	2 Stops	IC ICE	2nd class	90.40 €

On the left, a filter sidebar is visible, showing the following settings:

- Sort by: CO₂
- Price range: 65.98 € - 2,000.00 €
- Selected providers: OeBB, DB PST, BeNeRail (these are highlighted with a red border)
- Unselected filters: Show bookable tariffs only

VII. Automatic Update of booking changes

Administration The setting is done automatically and cannot be set administratively.

ID 14404 

For bookings via bahn.business, a daily synchronization is now performed.

Cancellations or partial cancellations made directly with Deutsche Bahn (e.g., via Navigator, the website, or customer service) are automatically reflected in onesto.

VIII. Bahncard online booking: Notification email to supervisor / central recipient

Administration To use this function, please get in touch with your onesto contact.

ID 15576 

In addition to the previously available option to send a notification email to a supervisor or central email address when booking a Bahncard via bahn.business, this feature is now also available for customers using the PST interface.

I. Adjustment of the display for flights not yet confirmed

Administration The setting is done automatically and cannot be set administratively.

ID 14337

For flight bookings via the travelfusion interface, it may happen that flights are not immediately confirmed by the selected airline. The notice in onesto indicating that a booking is not yet confirmed has now been improved:

Confirmation

Your online booking was successful.

To use the travelfusion interface, please contact your onesto representative.

II. Display of bus transfers in the flight results list

Administration The setting is done automatically and cannot be set administratively.

ID 16137

If a leg or feeder is operated by bus under a regular flight number, this is now highlighted during booking in the same way as the previous notice for rail journeys.

III. Entry into the USA

Administration The setting is done automatically and cannot be set administratively.

ID 16086 

Due to changed entry requirements for the USA, specifying a gender is now mandatory.

Gender-neutral or non-binary entries may cause issues when entering the USA.

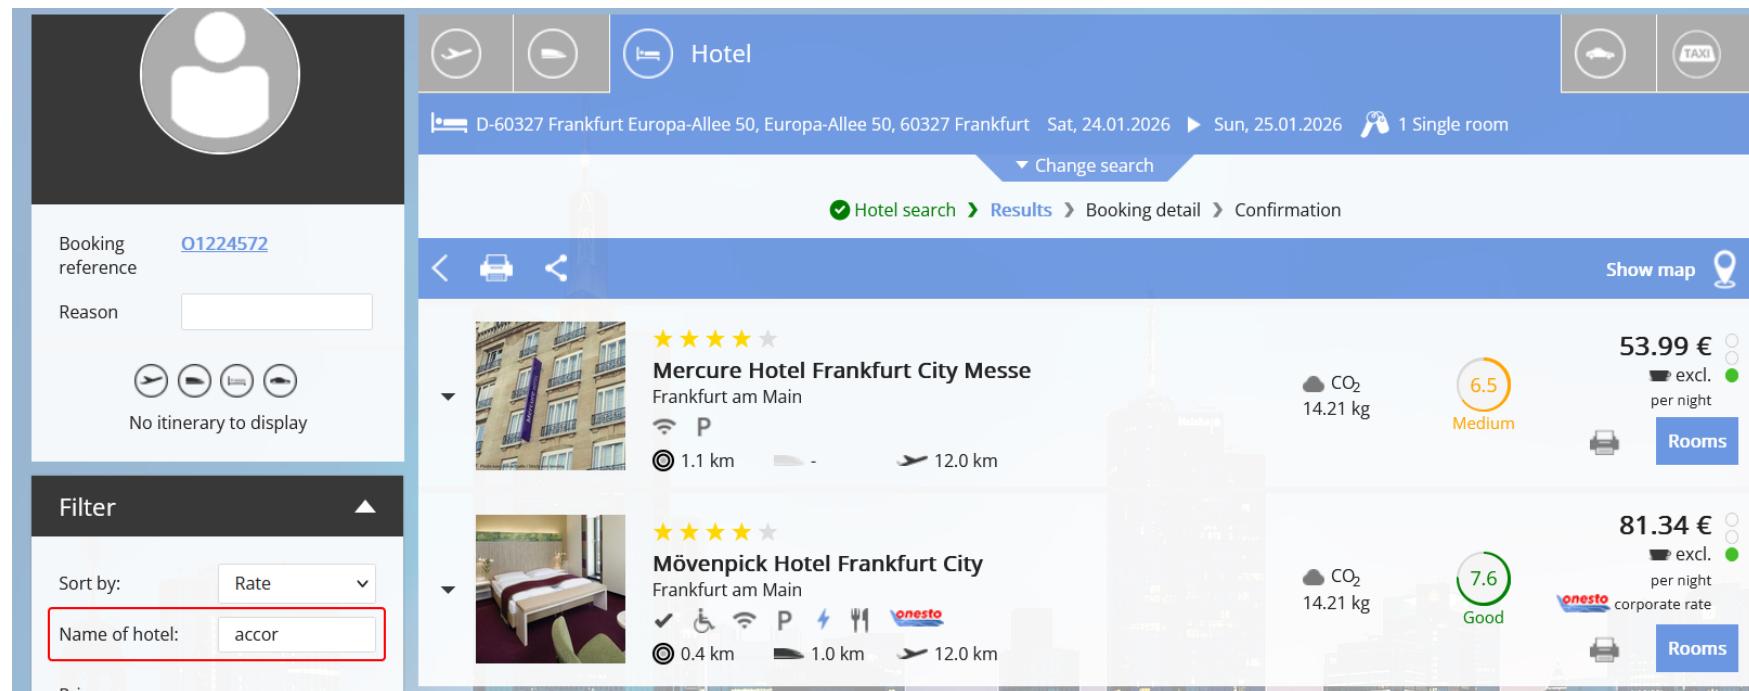

If "not specified" is selected under salutation in the traveller profile, a choice must be made for this booking.

I. Hotel filter by hotel chain name

Administration The setting is done automatically and cannot be set administratively.

ID 16246 

The search functionality within the hotel results list has been expanded:
in addition to searching for specific hotel names, it is now also possible to search by hotel chain names—for example, not only for "Ibis" but also for "Accor" (if provided by the supplier).

The screenshot shows the onesto travel booking interface. On the left, there is a sidebar with a user profile icon, booking reference (01224572), and a note that there is no itinerary to display. Below this is a 'Filter' section with a dropdown for 'Sort by' (set to 'Rate') and a text input field for 'Name of hotel' which contains 'accor' and is highlighted with a red border.

The main content area is titled 'Hotel' and shows search results for 'Accor'. The results list includes:

- Mercure Hotel Frankfurt City Messe**
Frankfurt am Main
★ ★ ★ ★
1.1 km 12.0 km
CO₂ 14.21 kg 53.99 €
- Mövenpick Hotel Frankfurt City**
Frankfurt am Main
★ ★ ★ ★
0.4 km 1.0 km
CO₂ 14.21 kg 81.34 €

At the bottom of the results list, there is a note: 'onesto corporate rate'.

I. Note on Booked Electric/Hybrid Vehicle (1/2)

Administration The setting is done automatically and cannot be set administratively.

ID 15962 

After booking an electric or hybrid vehicle, a corresponding note is now displayed in the travel itinerary (both online and in the PDF).

After booking an electric or hybrid vehicle, a corresponding note is now displayed in the travel itinerary (both online and in the PDF).

II. Preselection of Preferred Car Rental Providers

Administration To use this function, please get in touch with your onesto contact.

ID 14754

The option to prefilter preferred car rental providers in the results list has been expanded, allowing not only a single provider but also multiple providers to be preselected (in the example below, the providers Hertz and Sixt).

The screenshot shows the onesto rental car search interface. On the left, a sidebar for 'Mustermann, Dr. Max ...' displays booking details (reference O1224575) and a 'Filter' section. The 'Filter' section includes a 'Sort by' dropdown (set to 'Distance'), a 'Price' range slider (43.99 € - 286.46 €), a 'Car type' dropdown (set to 'All'), and a checkbox list for preferred providers. The checkbox list is highlighted with a red border, showing 'Enterprise' (unchecked), 'Sixt' (checked), 'Avis' (unchecked), 'Hertz' (checked), and 'Navigation system' (checked). The main search results are for 'Mini' cars in Frankfurt, Rhein-Main, on Tuesday, 30.12.2025, at 08:00 and 17:00. The results list two 'Citroen e-C3' options from 'SIXT'. The first is located in 'Frankfurt a. M. Flughafen' with a price of 78.02 €. The second is located in 'Frankfurt a. M. West/Messe' with a price of 55.41 €. Both options include 0 km, FRA as the destination, unlimited mileage, 0.00 kg/100km CO2, 3.45 € per day, A insurance, and electricity included. Each result has a 'Select' button.

III. One-Way-bookings on nearby stations

Administration The setting is done automatically and cannot be set administratively.

ID 16127 

Previously, there was a restriction on vehicle bookings at nearby stations, such as different terminals of an airport.

This restriction has now been removed, allowing one-way bookings to be made as well.

I. Advance notices

New Development: onesto2go for iOS and Android

The new onesto2go app is being developed as a native app with a completely new and intuitive design for iOS and Android.

The app offers higher speed and an improved user experience, supported by the new onesto API.

Kyte

Kyte is a modern API aggregator that provides airlines with a simple, standardized, and flexible connection for distributing flight fares, ancillaries, and bundled offers based on NDC. Onesto has already connected Ryanair via Kyte and will continuously expand connections to additional airlines and low-cost carriers.

Integration of Distribution Technologies

Distribution Technologies is a global leader in ground transport technology (bus, train, ferry), offering an innovative platform for worldwide booking and distribution of ground transport. Onesto is working on integrating selected providers via Distribution.

New onesto API

The newly developed onesto API enables quick, secure, and flexible integration of our products and services into your systems, allowing bookings and other processes to be executed simply and automatically.

onesto AI Smart Solutions

Artificial intelligence is not a trend — it's the future. Onesto is actively exploring AI technologies, language models, and solutions to integrate onesto smart solutions into all products. These provide users with new ways to optimize booking and accounting processes, accelerate decision-making, and benefit from innovative, automated support.

MS Teams Integration

The integration of MS Teams into onesto will include multiple functions for travel management. Users will be able to initiate and manage bookings directly from MS Teams. An approval process and a feature to share trips with colleagues will also be implemented. All upcoming and past trips will be clearly accessible at any time within MS Teams.

Dashboard Enhancements

The existing Travel Management Dashboard will be enhanced in terms of both functionality and design.

Input filters will be optimized, CO₂ data for additional modes of travel will be added, and new export options will be developed.

Connection to Passenger Rights Partner

Onesto is working on a new partnership and interface with a market-established provider for passenger rights, allowing travellers or companies to claim compensation or refunds for flight disruptions easily and without financial risk.
