HOTEL

I. onesto smart recognizing 24

II. Entry of multiple guest names in ehotel 26

RENTAL CAR

I. On request bookings Europcar 27

ROADMAP

I. Advance notices 28

I. MYFLYRIGHT integration

Administration To use this function, please get in touch with your onesto contact.

ID 13581

To better support customers in the event of flight delays or cancellations, onesto has partnered with MYFLYRIGHT.

This new partnership enables compensation claims to be submitted more easily and processed more quickly. MYFLYRIGHT GmbH is a company specializing in passenger rights and assists travellers in enforcing their claims against airlines. The service evaluates potential compensation and, if desired, handles the entire claims process. Travellers and travel arrangers are automatically notified about compensation claims.

A one-time company registration with MYFLYRIGHT is required in order to use this service.

II. New onesto2go mobile app for iOS and Android

Administration To use this function, please get in touch with your onesto contact.

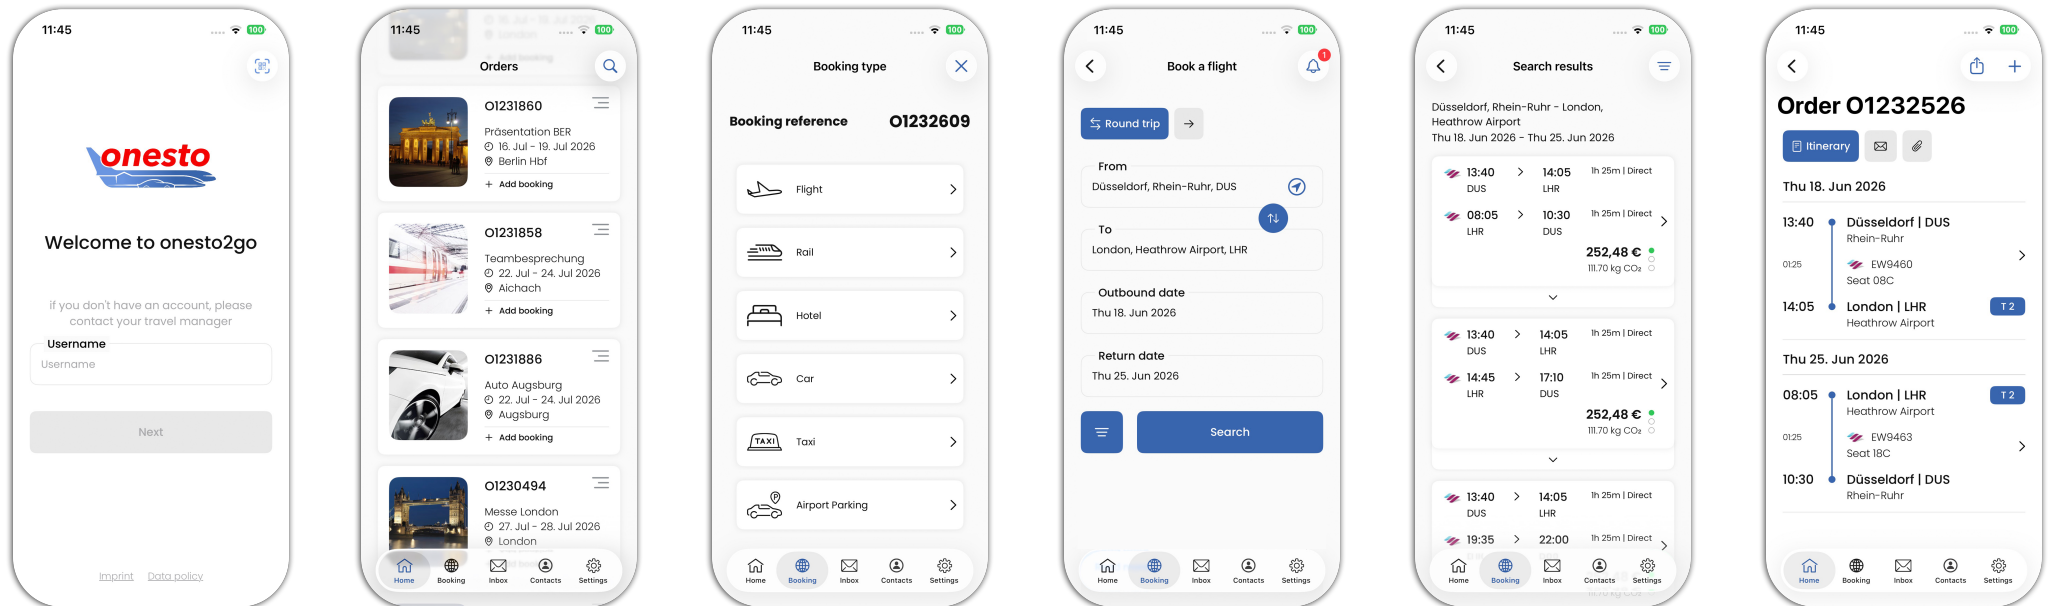

ID 16770

We are pleased to announce that the new onesto2go app will be released in its first version for iOS and Android at the end of Q2 2026.

As a native app (based on the new onesto API) with a completely redesigned and intuitive interface, it offers higher speed and an improved user experience compared to the current app. The existing onesto2go app will remain available temporarily, allowing both versions to run in parallel for the time being. Travel managers can decide which app travellers are allowed to use and can enable or restrict access for their company or subsidiaries accordingly.

The new onesto2go app will include all existing features from the current app (except expense reporting) and will also introduce new functionalities. These include, among others, a new password-free registration and login process, an optimized inbox-style message display, seat maps for flights and rail, dark mode optimization, and many more enhancements.

The new onesto2go app will be continuously developed, with many additional features already planned for future updates. Development of the current onesto2go app will be discontinued (except for critical issues and major bug fixes until the app is fully deactivated).

III. Smart pre-filling of hotel and rental car search

Administration The setting is done automatically and cannot be set administratively.

ID 16436

After booking a flight or train, the destination of that booking is automatically pre-filled as the destination for hotel searches or rental car pick-up.

Depending on the configuration, frequently used business travel destinations may also be displayed as selectable options.

Builder, Marlene

IV. Travel date as a criterion in notification management

Administration To use this function, please get in touch with your onesto contact.

ID 16017

Notifications can now also be managed based on the travel date.

Within notification management, it is now possible to display messages for:

- Routing-related messages
- Restricted destinations
- Destination information
- Send Email

A notification can be shown if the trip takes place during a defined period.

VI. Removal of profile management from old layout

Administration The setting is done automatically and cannot be set administratively.

ID 16482 

As of this release, profile administration can only be performed in new layout.

The corresponding menu items have been removed from the administration section in old layout.

VII. Extension of onesto Interfaces (1/2)

Administration To use this function, please get in touch with your onesto contact.

ID 16592

The interface for managing permitted additional data (e.g. cost centers or project numbers) now supports the capture of user-specific additional data. This data is subsequently available to users both in their profile and within the booking process for selection or validation, enabling more precise control over permitted additional data.

The map shows a street view of Munich, Germany, with a red location pin placed at Isartorpl. 8. The map includes street names like Frauenstraße, Marienplatz, and the Isar river. A scale bar at the bottom indicates 1000 feet and 250 meters.

These destinations can be considered by users during the search for travel services and can also be displayed in the map view, for example in the hotel section.

VIII. CO₂ data in standard reports

Administration The setting is done automatically and cannot be set administratively.

ID 16602 

Through our partner Squake, we receive accurate CO₂ information for all modes of transport.

This information is now also displayed in the “booking overview all”, giving you the ability to monitor your CO₂ footprint within your travel budget at any time.

IX. Fare Information in Standard Rail Reports

Administration The setting is done automatically and cannot be set administratively.

ID 16533

In the standard reports for the “booking overview Rail,” we now display the selected fare of the rail provider.

The fare is shown in the language provided by the rail provider.

X. Changes to Park.Aero billing process

Administration The setting is done automatically and cannot be set administratively.

ID 14096 

Previously, when booking a parking space via onesto with Park.Aero, the booking amount was charged to the AirPlus account by onesto or credited accordingly in the event of a cancellation.

With this release, billing will be handled directly by Park.Aero or by the airport where the booking was made.

Please inform your accounting department of this change, if applicable.

I. DB Partner Interface (PST) – Refund link based on passenger rights

Administration The setting is done automatically and cannot be set administratively.

ID 15869

For bookings made via the DB partner interface (PST), we now provide an option to apply for compensation under passenger rights.

Travellers can use this option to submit claims for delays.

ICE 991 (DB Fern...)

Alternatively, compensation claims under passenger rights can also be processed automatically via our partner refundrebel.

II. Deutsche Bahn – Changes regarding BahnCard and BahnBonus

Administration The setting is done automatically and cannot be set administratively.

ID 15988 

Advance Notice:

Deutsche Bahn is changing the system for collecting BahnBonus points.

In the future, bonus points will be collected exclusively using the 12-digit Bahn customer number, which can be stored in onesto.

The previous BahnBonus or BahnCard number will no longer be required by Deutsche Bahn for the booking process, for collecting points, or for verifying the BahnCard.

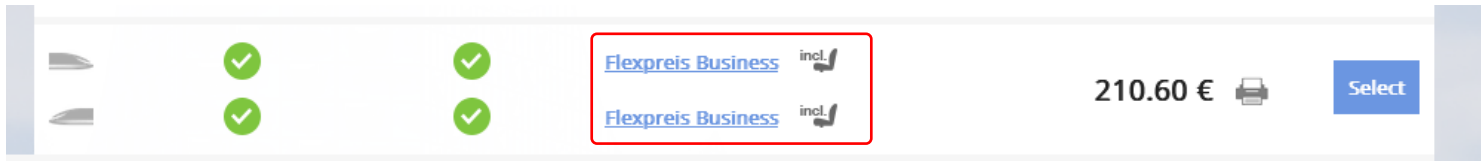

The change is expected to take place at the beginning of June. onesto will implement the necessary adjustments and provide separate information.

III. Deutsche Bahn & ÖBB – Seat Reservation Included in the fare

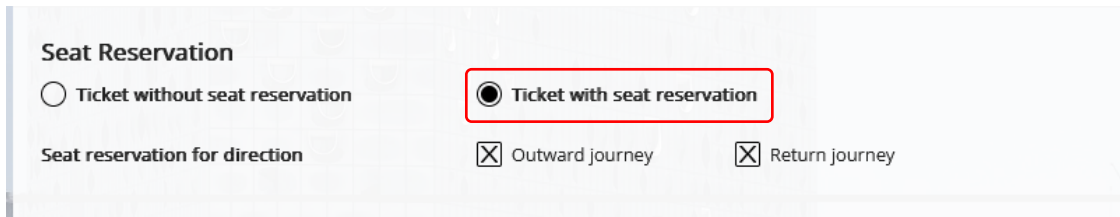

Administration The setting is done automatically and cannot be set administratively.

ID 15872

When booking a fare that includes a seat reservation, the option “Ticket with seat reservation” is now automatically preselected.

This ensures that the complimentary seat reservation is not overlooked.

Travellers can, of course, still select seat preferences for ÖBB or choose a seat from the seat map for Deutsche Bahn.

IV. ÖBB – Travel itinerary and information in German or English

Administration The setting is done automatically and cannot be set administratively.

ID 16600 

For bookings with ÖBB, we now transmit the traveller's language preference to ÖBB.

ÖBB provides travel plans and travel information in German and English:

- Travellers with a German language setting in onesto will receive travel information from ÖBB in German.
- Travellers with any other language setting in onesto will receive travel information from ÖBB in English.

Depending on customer requirements and configuration, onesto itself currently supports the following languages: German, English, French, Italian, Czech, and Romanian.

I. New Lufthansa Direct Interface NDC 24.1

Administration To use this function, please get in touch with your onesto contact.

ID 15738

We are pleased to be among the first online booking systems to migrate to the new Lufthansa Group NDC direct interface (version 24.1).

The following functionalities have already been implemented and certified by the Lufthansa Group:

- Availability search including pricing
- Fare details and rebooking/cancellation fees
- Booking process with immediate or (optionally) delayed ticket issuance
- Payment by credit card – including both standard credit cards and lodge cards with additional data transfer
- Cancellation after booking (as previously optional for onesto customers)

A new aspect of the booking process is that seat selection and the booking of additional baggage now take place only after the flight booking has been completed. This allows these services to be added or modified at a later stage.

Currently still in certification:

- Online rebooking including ticket exchange

At a later stage, additional features will be introduced, including online rebooking with ticket exchange, optional add-ons such as WiFi on board, SAF and PAF fares, as well as so-called “involuntary rebooking + cancel” (i.e. rebookings and cancellations due to flight changes or cancellations). These enhancements will be announced separately in upcoming release notes.

Important for our travel agency partners:

Bookings made via the new interface will no longer be processed in the Lufthansa/Farelogix SPRK system. All changes can instead be handled via the integrated travel agency module in onesto Agent.

Once final certification by the Lufthansa Group has been completed, migration to the new interface can be carried out in coordination with the respective onesto contact person.

II. travelfusion | transmission of VAT

Administration To use this function, please get in touch with your onesto contact.

ID 16469

The VAT identification number stored in the onesto company profile is now transmitted to Travelfusion during booking and displayed on the Travelfusion invoice.

III. Kyte | new Lowcost Airlines available

Administration To use this function, please get in touch with your onesto contact.

ID 16422 

With this release, additional low-cost airlines are now available for booking via the Kyte interface.

These include the following airlines:

- **Volotea**

- **Transavia**

- **Wizzair:**

Please note the following booking process:

When making a booking, the traveller's email address is transmitted to Wizz Air. If this email address is not yet registered with Wizz Air, the traveller will receive two emails: a booking confirmation and a "welcome email" enabling them to log in on the Wizz Air website.

This allows travellers to log in directly on the Wizz Air website to make necessary changes.

As soon as Wizz Air provides the option to make changes online, we will inform you accordingly.

- **easyjet:**

Please note that for customers already using the easyJet direct interface, this additional option is available in the system as a backup.

For detailed information or route networks, please refer to the respective airline websites:

- www.volotea.com
- www.transavia.com
- www.wizzair.com
- www.easyjet.com

IV. Kyte | new NDC Airlines available (1/2)

Administration To use this function, please get in touch with your onesto contact.

ID 14432 | ID 14437

We are pleased to now offer the first two airlines with NDC via the Kyte interface.

These include:

British Airways

The full booking process has been implemented, including rebooking and cancellation, as well as the option to add additional services such as baggage at a laterstage.

I. onesto smart recognizing (1/2)

Administration The function is automatically activated.

ID 15079

With the onesto smart solution “smart recognizing,” we make it easier for you to select suitable hotels.

onesto automatically identifies which hotels the traveller or their colleagues have previously booked and highlights them with new icons in the hotel overview.

The screenshot shows the onesto app interface for a hotel search. The user is Marlene Builder. The search is for a single room in Berlin from Monday, 05.10.2026 to Tuesday, 06.10.2026. The results page shows a list of hotels with their respective prices, ratings, and CO2 emissions. A red box highlights the 'onesto' logo icon next to the H2 Hotel Berlin-Alexanderplatz listing, indicating it is a previously booked hotel. Another red box highlights a similar icon next to the 36 Rooms Hostel Berlin Kreuzberg listing. The interface includes a user profile on the left, a search filter section, and a navigation bar at the top.

Hotel Name	Location	Price (per night)	Rating	CO2 Emissions (kg)	Distance (km)
H2 Hotel Berlin-Alexanderplatz	Berlin	85.46 €	8.2 (Very Good)	21.07	3.0
36 Rooms Hostel Berlin Kreuzberg	Berlin	52.02 €	4.6 (Bad)	21.07	5.1
Generator Berlin Mitte	Berlin	58.40 €	7.7 (Good)	21.07	1.5
Coffee Inn Hostel Berlin	Berlin	66.38 €	8.0 (Good)	21.07	3.6
The Circus Hostel	Berlin	82.67 €	8.7	21.07	-

I. onesto smart recognizing (2/2)

Administration The function is automatically activated.

ID 15079

The group icon indicates the frequency of booked stays in three different color-coded levels (occasional, frequent, very frequent).

MEININGER Hotel Berlin East Side Gallery
 Berlin
 4.9 km
 CO₂ 21.07 kg
 8.0 Good
 97.20 € excl. per night
 Rooms

The icon with the profile picture/avatar marks hotels that the traveller has already booked. A new filter (purple icon) allows users to specifically search for previously booked hotels and provides an optimized overview.

36 Rooms Hostel Berlin Kreuzberg
 Berlin
 5.1 km
 CO₂ 21.07 kg
 4.6 Bad
 52.02 € excl. per night
 Rooms

As a Travel Manager, you can define the frequency at which hotels should be highlighted.

To do so, you set the threshold values for the three levels within the Travel Management hotel administration.

II. Entry of multiple guest names in ehotel

Administration The setting is done automatically and cannot be set administratively.

ID 14906

When booking an ehotel rate with more than one room, it is now possible to enter additional guest names during the booking process.

The screenshot shows the onesto booking interface for 'Sky Apartments Vienna'. A modal titled 'Take over guests names' is open, allowing the user to enter names for multiple guests. The modal contains a table with columns for Salutation, First Name, and Surname.

	Salutation	First Name	Surname
1.	Mr	Tom	BUILDER
2.	Mrs	Marlene	BUILDER

Buttons at the bottom of the modal: 'Close window' and 'Save and close'.

Background details from the booking page:

- Booking reference: Q1230849
- Reason: [Empty field]
- Hotel: Sky Apartments Vienna, Taborstraße 52, 1020 Wien
- Arrival: Thu, 25.06.2026 - Fri, 26.06.2026
- Room: 2 Single
- Additional guests: No other guests.
- Standard Rate: Apartment, Tages Preis, Apartment, Frühstück exklusive 18,00 EUR, Kostenfrei stornierbar, Kostenfrei stornierbar vor 23.06.2026 um 23:59 Uhr Hotelzeit, danach Stornogebühr 130,00 EUR exklusive 18,00 EUR. Zur Garantie der Buchung ist eine Kreditkarte mit Kartenprüfnummer erforderlich.

I. On request bookings Europcar

Administration To use this function, please get in touch with your onesto contact.

ID 16066 

Certain bookings with Europcar can only be made on request, for example delivery to a preferred address or bookings outside of station opening hours.

As of now, we receive automatic confirmations from Europcar for these bookings.

Once the booking has been confirmed or cancelled, the person making the booking will receive an email notification.
The trip will be updated automatically.

I. Advance notices

New onesto API

With the newly developed onesto API, you can integrate our products and services quickly, securely, and flexibly into your systems, enabling you to execute bookings and other processes easily and in an automated way.

MS Teams Integration

The integration of MS Teams into onesto will include several features for travel management. Users will be able to initiate and manage bookings directly from MS Teams. An approval workflow and a function for sharing trips with colleagues will also be implemented. All upcoming and past trips will be clearly accessible in MS Teams at any time.

Dashboard Enhancements

The existing Travel Management Dashboard will be enhanced in terms of both functionality and design.

This includes, among other things, optimized input filters, the addition of CO₂ data for further modes of transport, and the development of new export options.

onesto MCP Server

The onesto MCP server (Model Context Protocol) acts as an intermediary layer for connecting AI language models (LLMs) and provides access to the onesto API and its functionalities. The server is currently under development and is intended to become the central interface for model-based data exchange in the future.

Midoco Integration

Midoco is a leading provider of mid-office and profile management software for the travel industry. In the future, travel agencies will be able to send booking data directly from onesto to Midoco, helping to reduce or eliminate passive PNRs and to optimize or even fully automate processes.
