- I. Ajax Airport Search ..... 37
- II. DB Navigator App Usage Out Of onesto2go..... 38

## GENERAL

### I. Simplification Of Date Entering In The Calendar

<b>Functionality area</b>	Calendar Area	
<b>New functionality</b>	Return Journey Calendar Opens Automatically	

#### Description:

Entering the date for the return trips has been simplified. In the calendar, after selecting the date for the outward journey, the calendar for the return trip opens automatically.

Round-trip   
  One-way   
  Multiple Segments

<p><b>Origin</b> <input type="text" value=""/> </p> <p><b>Departure date</b> <input type="text" value="Thu, 29.11.2018"/> </p> <p><b>Departure time</b> <input type="text" value="07"/> : <input type="text" value="00"/> <input type="button" value="Departure"/></p> <p><b>Train type</b> <input type="text" value="Standard search"/> <input type="button" value="v"/></p> <p><b>Type of Ticket</b> <input type="text" value="One Trip"/> <input type="button" value="v"/></p> <p><input type="checkbox"/> Direct connections only</p> <p><b>1. ## GENERAL

### II. Delete Companies, Travellers And Journey Data

<b>Functionality area</b>	Companies, Travellers and Journey Data	
<b>New functionality</b>	Delete Companies, Travellers and Journey Data	

#### Description:

Companies, which will be closed, sold or will no longer book via onesto due to other reasons can now be deactivated in the administration. The deletion of a company was previously related to certain costs and needed to be ordered accordingly.

This extension allows now to delete companies without special costs and waiting times. Please turn to your onesto contact person, in case you wish to delete one or more companies and specify the related companies.

Company data, traveller and journey data can be deleted, as soon as journeys in the future no longer exist.

Your onesto contact person stays at your disposal, whenever you need to delete this data.

## GENERAL

### III. Save Profile And Journey Data

<b>Functionality area</b>	Profile And Journey Data
<b>New functionality</b>	Download Of Profile And Journey Data

#### Description:

The onesto users get the possibility to save the following data, via the button „Download“ person related data:

- all data, credit cards, membership cards as saved in the profile, will be shortly displayed (last four digits)
- all booked journeys

The download rights are not granted to travel arrangers or administrators for profiles of third parties, only the involved person can save his/her data.

## GENERAL

### IV. Simplified Profiles Deletion

<b>Functionality area</b>	Profiles
<b>New functionality</b>	Profiles Deletion

#### Description:

The profiles delete action is currently possible in onesto via the settings of automatic anonymity, followed by the automatic deletion. We have now developed a new functionality for customers, who are not using this functionality, but according to DSGVO they must urgently delete profiles.

The user should contact in such cases the responsible onesto contact person, who will delete the profile involved.

Profiles can then be deleted, when no active journey in the future exists.

In order to delete this, turn please to your onesto contact person.

## GENERAL

### V. Supplementary Additional Data Transmission Single Sign On To onesto

<b>Functionality area</b>	Login / Single Sign On	
<b>New functionality</b>	Supplementary Additional Data Transmission Single Sign On To onesto	

#### Description:

The transmission of the additional data at the Single Sign On to onesto has been extended. When using the SSO solution with creating or opening an order, it is now possible to transmit next to personal additional data (e.g. personal number, cost center), also booking related additional data (e.g. project number, journey number).

Herewith this data will no longer be needed to be entered manually during the booking process.

In case of questions related hereto, turn please to your onesto contact person.

## GENERAL

### VI. Approval Process Extension

<b>Functionality area</b>	Approval Process
<b>New functionality</b>	Approval Limit

#### Description:

Starting with this release, it is possible to define a limit valid per mean of travel. This limit defines the starting point, when an approval is needed. The approvers will receive, with this functionality, in the future, only journeys for their approval, that exceed the defined value.

If the limit is set for instance at 100 EUR, independent of the traffic light colour, no approval e-mail will be sent to the approver for booked items under 100 EUR per mean of travel. Such bookings are considered automatically approved.

If you wish to use this functionality, turn please to your onesto contact person.

## GENERAL

### VII. „Circula“ Integration

<b>Functionality area</b>	Travel Expenses
<b>New functionality</b>	Integration Of Circula

#### Description:

Starting with this release, a further integration of a direct connected travel expense partner has been realised. Out of onesto (Customer and onesto2go) it is now possible to transmit booking data automatically. In this way, a permanent data update on Circula sites takes place in case of new bookings, rebookings, as well as cancellations. In case a profile in Circula is not yet available, this will be automatically created.

For travel expense purposes, a Single Sign On jump to Circula will follow, in order to fill out the travel expense claim and to enter the receipts in Circula.

The corresponding expense status will be synchronized back to onesto automatically, so that it is always visible in onesto, too.

The screenshot displays the onesto web application interface. At the top, the 'onesto' logo is on the left and the 'Circula' logo is on the right. Below the logos is a navigation menu with links for Home, Calendar, News, Support, Profile, and Administration. The user's name 'Löff, Ralf' and a 'Logout' button are visible in the top right corner. The main content area is divided into tabs for Flight, Rail, Hotel, Car, and Door2Door. Under the 'Flight' tab, there is a section for 'Booking Reference O1077597' covering the dates 'Tue, 13.11.2018 - Wed, 14.11.2018'. Below this, there is a 'Circula Traveller' section with a 'Reason' input field and a 'display cancelled itinerary' checkbox. The main table lists two flight segments: one from Munich to Leipzig on Tue, 13.11.2018 (08:05 - 09:00) on Lufthansa LH2164, and another from Leipzig to Munich on Wed, 14.11.2018 (20:25 - 21:25) on Lufthansa LH2171. Below the flight segments, there is a 'Rental car' section for the same dates, showing a booking from LEIPZIG HALLE FLUGHAFEN to LEIPZIG HALLE FLUGHAFEN on Tue, 13.11.2018 (09:30) and Wed, 14.11.2018 (19:55) with EuropCar. On the right side of the table, there are buttons for 'Cancel', 'Rebook', 'Online Check-In', 'Calendar Entry', and 'Travel&Expense' for each booking entry.

## GENERAL

### VIII. XML Export Extension

<b>Functionality area</b>	XML Export
<b>New functionality</b>	XML Order Data Export Extension

#### Description:

The XML Order Data Export has been extended by some more fields.

The following information will also be delivered now:

- Travel Destination for flight / rail  
     <BOOKING destination ="HAM">  
     ...  
     </BOOKING>
- Internal ID of the traveller  
     <TRAVELLER>  
     ...  
         <SAFEREFERENCE>1234567890</SAFEREFERENCE>  
     </TRAVELLER>

You will find further details to the corresponding fields in the documentation to the onesto XML data export. Your onesto contact person stays at your disposal hereto.

## GENERAL

### IX. Display onesto2go Usage In Reports

<b>Functionality area</b>	Reports
<b>New functionality</b>	Display The Usage Of onesto2go

#### Description:

In the onesto reports, there is now a supplementary differentiation, if a booking has been performed via „onesto Customer“, „onesto Agent“ or via mobile phone in „onesto2go“.

In the standard report „Overview travellers“ it will be now displayed, if for a certain profile the usage of onesto2go is activated.

## GENERAL

### X. Own Company Credit Card For Transfer Services

<b>Functionality area</b>	Transfer Services
<b>New functionality</b>	Company Credit Card For Transfer Services

#### Description:

For integrated transfer services in onesto (e.g. Talixo, Sixt MyDriver) it is now possible to use an own company card.

## GENERAL

### XI. Takeover Additional Data During Profile Move

<b>Functionality area</b>	Traveller Profile	
<b>New functionality</b>	Takeover Additional Data During Profile Move	

#### Description:

In case a profile will be moved to another company, it is now possible to takeover in the new profile also the previous additional data, like, for instance, the cost center. It is assumed that, the additional data, which must be takeover is also allowed and available in the new company.

# RAIL

## I. „Spar“ Prices In The Search Result List Via NVS (1/2)

<b>Functionality area</b>	NVS Rail Booking
<b>New functionality</b>	New Price Column „Spar“ Price

### Description:

For rail bookings via NVS, we extend now the price display due to the „Spar“ prices and introduce a new price column (price column of the „spar“ prices).

In order to be able to realize this, the start railway has been removed, this information is further available and displayed as train connection:

Providers > Search train > Results > Train details > Confirmation ▶ Messages

Your itinerary: Bremen Hbf -> FRANKFURT(MAIN)

outbound   :  inbound   :  ▶ Search

## III. Online Rebooking And Cancellation Of Flight Bookings (1/3)

<b>Functionality area</b>	Flight	
<b>New functionality</b>	Online Rebooking And Cancellation Of Flight Bookings	

### Description:

Starting now, the user can independently cancel, resp. rebook online flight bookings himself / herself (the fare's terms and conditions apply). Hereto it is assumed that the booking itself was booked via Farelogix (for Lufthansa, Austrian Airlines, Swiss, Brussels Airlines), resp. via the direct interfaces of the airlines Eurowings, easyjet, British Airways and Iberia.

Online bookings performed via a GDS (e.g. Amadeus, Galileo) cannot be rebooked or cancelled by the user himself/herself independently. The rebooking fees or extra charges will be delivered directly by the service providers.

Example for rebooking a return flight:

✚ Flight	Wed,21.11.2018	Munich - Paris	06:45 - 08:20	Lufthansa LH2226 Economy Flex (Q) Snack or Brunch on board	Online booking	<input type="button" value="Cancel"/> <input type="button" value="Rebook"/> <input type="button" value="Online Rebook"/> <input type="button" value="Calendar Entry"/> <input type="button" value="Calendar Entry"/>
	Fri, 23.11.2018	Paris - Munich	17:55 - 19:20	Lufthansa LH2235 Economy Classic (Q) Snack or Brunch on board

<b>Functionality area</b>	Car Pool	
<b>New functionality</b>	Block Time After Car Return Independent Of The Opening Times	

### Description:

Next to the „Block time after return“, there is now additionally the possibility to define a time buffer between two car reservations, which does not take care of the station’s opening times. Herewith it will be avoided that, a car is not available for the period set, after a (partial) return outside the opening times of the station. As long as the set time also outside the station’s opening times is respected, the car will automatically stay at your disposal after the expiration of this time.

Car pool > Car pool station > Carpool admin - station details
