## GENERAL

### III. Calendar Improvement Travel Bookings

**Functionality Area** Date Selection Using Calendar  
**New Functionality** Calendar Improvement

#### Description:

The general calendar functionality for travel bookings supports the user in the selection of the needed travel dates, very easy, per mouse click. Via the calendar symbol, the user can open the calendar. The arrows (>>, <<) allow the user to click forward/backward. Now it is possible to select a booking date of maximum 364 days in advance. The system also protects now the user automatically from requesting wrong dates (not selectable dates will be grayed out).

## I. Extension Travel Management Flight

<b>Functionality Area</b>	Travel Management Flight	
<b>New Functionality</b>	Extended Best-Buy Search For Flight Connections	

### Description:

The new, extended Best-Buy functionality allows the display of a green traffic light for fast flight connections, although per definition these fares would get a red traffic light. For this purpose, a predefined supplementary duration in relation to the flight fare prices will be set.

Black list filters by airline or booking leadtime will not be overwritten. All other flights will get in the system the same traffic light colour, as previously.

## I. Booking/Order At Local Taxi Providers

<b>Functionality Area</b>	Taxi Booking	
<b>New Functionality</b>	Booking/Order At Local Taxi Providers	

### Description:

Next to the previously available possibilities to book a taxi via onesto, it is now also possible to connect local taxi providers.

For each provider it is possible to define stations, where taxi bookings will be created within a certain search radius. The booking request follows in the background by sending an e-mail to the taxi company and this can then be confirmed or rejected.

The status of the booking in onesto will be changed, depending on the action performed by the taxi company. The traveller will be informed by e-mail about each change of the status.

 HOTEL

I. Bing Overview Map

Functionality Area	Overview Map	
New Functionality	Extended Display Options For Bing Overview Map	

**Description:**

The existing Bing overview map is now more precisely. Via the drop-down selection it is now possible to choose between the default selection of the standard street map and an aerial view. When the aerial view is selected, the display will be changed accordingly.
