GENERAL

II. New Layout Points Of Interest (1/2)

Functionality Area	Points Of Interest Maintenance	
New Functionality	Points Of Interest Maintenance Improvement And Extension	

Description:

In the maintenance of the points of interest it is possible to define points of interest, that can be used via the search functionality in onesto, for instance the search for a certain hotel in the neighbourhood of a company location.

The layout as well as the maintenance and the way of entering locations has been further improved. It can now also be defined per location, for which means of travel, the location will be displayed.

GENERAL

V. Notification Management Extension By Entering E-Mail Addresses

Functionality Area	Notification Management
New Functionality	Entering Recipient E-Mail Addresses

Description:

onesto Notification Management offers several possibilities.

Routing restricted notifications: here you can define messages according to the routing and/or destination.

Furthermore it is possible to define actions here, that can also result in stopping a booking.

Additionally, you can define restricted destinations and supply destination specific information. Also an automatic e-mail transmission can follow hereto.

The action „E-mail transmission“ in Notification Management has been extended by one field. In the new field one or more e-mail addresses can be entered as recipient.

Recipient

<input type="checkbox"/>	Traveller
<input type="checkbox"/>	Booker
<input type="checkbox"/>	Senior from booking
<input type="checkbox"/>	All seniors in traveller's profile
<input type="checkbox"/>	Senior from booking (to booker, when not available)
<input type="checkbox"/>	All seniors in traveller's profile (to booker, when not available)
Other recipients	<input type="text"/> (Several recipients must be separated by comma)

GENERAL

VI. Automatic Display City Proposals

Functionality Area	City Search	
New Functionality	Airports Codification / List Activation	

Description:

For a better recognition of the search results for the airports, these will now be displayed with the respective country flag. This simplifies the selection of the wished airport.

Starting with this release, the automatic display of the city proposals will be activated automatically for all systems.

GENERAL

X. SMS And Push Notifications To onesto2go

Functionality Area	onesto2go
New Functionality	Notification Via onesto2go

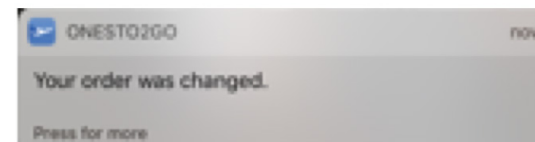

Description:

The mobile app onesto2go contains a variety of functions like booking overview, booking functionality, etc.

Supplementary now, the push notifications are implemented. These are sent out directly on the mobile phone and displayed within onesto2go (operating system iOS; for Android and Windows Mobile, this is expected starting with September 2017). After receiving such a notification, this will be shown on the lock screen or it can be directly called up via onesto2go and completely available for reading.

The requirement for the transmission per SMS is to have this functionality activated in onesto (charged functionality). The requirement for a push notification is the agreement for receiving notifications during the first registration for onesto2go. We differentiate here between the transmission from onesto Customer, Agent and the overview card traveller.

For further questions hereto, please contact your onesto contact person.

GENERAL

XI. Extensions Order Data Export XML

Functionality Area	Order Data Export
New Functionality	New Fields For Export

Description:

The onesto order data export via XML has been extended with the following information:

- Flight arrival date
- Geo coordinates of the means of travel (airports, railways, hotels, car rental stations)

FLIGHT

I. NDC Direct Interface For Airlines

Functionality Area	Flight Booking
New Functionality	NDC Direct Interface Connection

Description:

onesto offers the possibility to connect various airlines via a direct interface, NDC (New Distribution Capability).

The following airlines are actually available (further are planned):

- Lufthansa Group (Lufthansa, Austrian, Swiss)
- British Airways
- Iberia
- American Airlines

By connecting the NDC interface the bookings take place directly in the system of the respective airlines, the usage of the classic reservation systems is not necessary anymore. Fees, which apply for the usage of the classic reservation systems, like DCC (Distribution Cost Charge) do not apply for the usage of NDC interfaces.

The ticketing takes place either directly at the airline or via the connected travel agency. The travel agency has access - via onesto Agent - to all bookings made through the NDC interface. Next to bookings, also rebookings and cancellations are now possible.

For the usage of this interface a separate agreement between the airline, the customer and onesto is necessary.

For further questions about this subject, please contact your contact person at the airlines and at onesto.

FLIGHT

II. Company Credit Card (AX) For Ryanair (Light Ticketing)

Functionality Area	Flight Booking Ryanair
New Functionality	Payment With Company Credit Card (AX)

Description:

For Ryanair bookings via AMADEUS Light Ticketing, it is now possible to use also company credit cards from American Express. The requirement related hereto is that, the connected travel agency supports AMADEUS Light Ticketing.

RAIL

I. Invoice Address Transfer For Rail Card Orders Via BIBE

Functionality Area	Rail Card Orders	
New Functionality	Invoice Address Transmission	

Description:

onesto supports now the invoice address transfer to the rail interface BIBE for a rail card order, when a different company credit card than AirPlus is used.

The address from the invoice address area will automatically be transferred.

The screenshot shows the onesto website interface. At the top, there is a red navigation bar with the DB logo, the onesto logo, and a 'Log out' link. Below the navigation bar, there are several tabs: 'BahnCard', 'Passenger', 'Payment' (which is active), 'Check & book', and 'Confirmation'. The main content area is divided into sections: 'Details of your card', 'How would you like to pay?', and 'Invoice address'. The 'Details of your card' section shows a table with card information: BahnCard 25 Business (2nd class), validity period (We, 09.08.17 - We, 08.08.18), card holder (Mr. Test Bibe), date of birth (01.01.1999), and a total price of 72.00 EUR. A transaction fee of 0.50 EUR is also listed. The 'How would you like to pay?' section indicates that the payment is made by Company Card. The 'Invoice address' section contains a form with fields for Company (onesto GmbH), Recipient details, Country (Germany (DEU)), State/province, E-mail (release@onesto.de), and Use street address (selected) with fields for Street, number (Augsburger Str. 14), Postcode/ZIP (86551), and Town/city (Alchach). There is also a 'Don't forget!' warning box on the right side of the page.

CAR RENTAL

I. Taxi/Limousine Service Bookable In One Step (1/2)

Functionality Area	Taxi Booking	
New Functionality	Booking Return Journeys	

Description:

It is now possible to mark with a check box in a taxi booking, that a return journey will be needed, so the address data for the return journey will not be requested again. Afterwards only the date and the time must be entered.

Per route, a separate booking will be generated in order to get more flexibility in case of changes.

CAR RENTAL

II. AirPlus Payment For Avis Bookings

Functionality Area	Avis Booking	
New Functionality	Payment With AirPlus	

Description:

onesto supports now the transmission of an AirPlus card for the payment to Avis. It is not necessary anymore to save the AirPlus card at Avis.

In order to use this functionality, this must be enabled at Avis.

For further questions, please contact your onesto contact person.

CAR RENTAL

III. Car Rental CD Numbers Per Country

Functionality Area	Car Rental Booking
New Functionality	Customer Numbers Per Country

Description:

Depending on the car rental provider, different customer numbers (CD_Numbers) per country, where the rental takes place, can be assigned. These can now be set for all car rental providers with the corresponding country code, on the company level.

HOTEL

I. New Hotel Result List

Functionality Area	Hotel Search	
New Functionality	New Layout Hotel Result List	

Description:

With the new hotel result list, onesto offers the user a modern and transparent site for displaying the available hotel results. Using photos, pictograms and various font sizes, the layout helps the user to find fast his/her personal wished result. This hotel result list can be activated in each system.

Starting with the release November 2017, this list will be activated automatically.

HOTEL

II. New Functionalities For Premier Inn (3/3)

Usage of the payment method CNP (Credit card not present)

Premier Inn offers the possibility to charge a hotel booking on the company. Two possibilities stay now at your disposal:

Company credit card as guarantee:

The company credit card will be transmitted as guarantee during the booking. In case of guarantee, this card will be used by the hotel as way of payment.

Business account:

During the transmission of the business accounts at the booking, an agreed way of payment will be used by the hotel.

For both payment methods the costs which will be taken over by the company can be defined:

- Breakfast
- WIFI
- Parking
- Other costs

For both payment methods no personal credit card during the booking is necessary. In order to use these payment methods, an agreement with Premier Inn is necessary.

 HOTEL

III. New Registration Mask For Hotel Price Limits

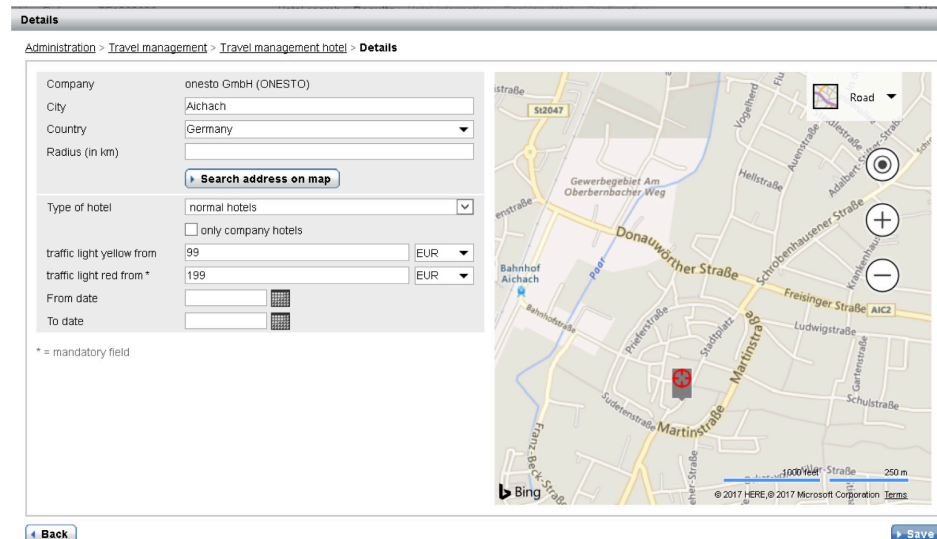

Functionality Area	Travel Management Hotel	
New Functionality	Entering Hotel Prices Maximum Limits	

Description:

The mask for entering hotel price limits has been extended. It is now possible to:

- Additionally search via the map for the city entered
- Define the radius

The last one means that the hotel price settings should not be valid e.g. only for „München“, but also for the adjacent city districts / communities, for which so far an own hotel price definition was necessary. Supplementary, different notations, e.g. München / Muenchen will now be considered.

HOTEL

V. Booking Of Non-Cancellable Hotel Rates On Arrival Day

Functionality Area	Hotel Booking
New Functionality	Non-Cancellable Hotel Rates

Description:

Even if, in general, it is not wished to show the user non-cancellable rates, this can be separately activated for requests on the arrival date, after 18.00 o'clock.

Due to the fact that, starting with this point in time only non-cancellable rates are available, the user would hardly get offers displayed. Via this setting, also non-cancellable rates will be displayed, in case of bookings on the very short notice.
