HOTEL

- I. Company Location Display In The Map Overview 13
- II. Hotel Provider Display On The Online Itinerary 14
- III. Booking.com Rebooking 15
- IV. Price Limits Extensions For Hotel 16

GENERAL

I. Less E-mails For The Line Managers

Functionality Area: Notifications Management

New Functionality: Reduction Of The E-mails To Line Managers

Description:

During each order change a booking confirmation will currently be sent out to the selected line manager. In order to reduce this e-mail quantity, it is now possible to create separate rules via the notification management.

Only the initial booking information will further be sent out to the selected line manager. A further one will be sent out to the line manager at a defined point in time, before the actual journey starts and only if there was a change in the order meanwhile.

GENERAL

II. Extended Search For Orders

Functionality Area: General

New Functionality: Search For Orders

Description:

In case the functionalities „Travel application“, resp. „Travel expense report“ are active, it is now possible to retrieve also this kind of orders during the order search.

Search order ✕

Please fill in the criteria for order search.

GENERAL

III. Monthly, Quarterly And Yearly Order Accounting Selection

Functionality Area: Order Accounting Travel Management

New Functionality: Extended Selection By The Passed Quarter And Year

Description:

The order accounting delivers a complete overview of the created orders. Between others, the number of orders with and without bookings, online resp. offline bookings, etc belong hereto. Supplementary, there is also a detailed overview of each single order.

For the period selection, next to the month, also the passed quarter and year are now available.

This functionality is only available for onesto administrators. If you are interested in it, please contact your onesto contact person.

GENERAL

IV. Order Data Export XML Extension With Provider Names

Functionality Area: Data Export

New Functionality: Provider Names Capture

Description:

The onesto order data export via XML was extended by the information regarding the provider names. This is interesting, e.g. for being taken over in the travel expense report.

The airline names (Lufthansa, Air France, etc), the rail names (Deutsche Bahn, SBB, ÖBB, etc), the hotel provider names (HRS, Booking.com, etc) and car rental names (Sixt, Europcar, etc) are now captured.

Example: `<PROVIDERNAME>LUFTHANSA</PROVIDERNAME>`

GENERAL

V. Ajax Search Results Display

Functionality Area: Location Search
New Functionality: Search Results Display And Sorting

Description:

The way how the search results for a location are shown has been further improved. Depending on the mean of travel, the users will be shown the relevant results and they will be individually sorted.

For a better recognition of the results, the respective country flags will be displayed now.

The screenshot displays the 'Hotel search' results page. At the top, there are tabs for 'Flight', 'Rail', 'Hotel', and 'Rental Car'. Below the tabs, the search criteria are shown: 'Booking Reference: TF1069927', 'Builder: Tommy', and 'Reason:'. There are also icons for travel modes (airplane, train, car) and a message 'No itinerary to display'. The main content area shows search results for the city 'Alchach'. The results are categorized into 'Recommended addresses', 'Railway stations', and 'Corporate locations'. Each result includes a country flag, a brief description, and a right-pointing arrow for more details.

Category	Result
Recommended addresses	86551 Alchach
	9711 Zlan/Alchach
	Alchach, Germany
	Alchach, Austria
	Alchach, Bavaria, Germany
Railway stations	Alchach
	Corporate locations
Corporate locations	onesto GmbH, Augsburgur Straße 14, 86551 Alchach

FLIGHT

I. Flight On-Hold Starting Time

Functionality Area: Flight Booking

New Functionality: Starting Time For Flight On-Hold

Description:

Next to the possibility to define a time, until when, the functionality „Flight On-Hold“ is available for the user, it is now also possible to define the time, starting when, this functionality will be offered to the user.

I. NVS Rail Display Connections Without Price Information

Functionality Area: Rail Booking Via NVS

New Functionality: Rail Booking Via NVS With Rail Connections Without Price Information

Description:

Many connections and combinations of third party providers are often not possible to be booked online via Rail or NVS. So far, such requests for connections without price information were not displayed in onesto. We have extended now this functionality, so that all possible connections in onesto will be shown, either with a bookable price or with a hint, that a price information does not exist:

RAIL

II. Train Type Display In The onesto2go Result List

Functionality Area:	Rail Booking In onesto2go	
New Functionality:	Train Type Display For A Better Identification	

Description:

For a better rail type identification, these will now be shown in the search result list.

An example of the old display:

DB 07:44 > 10:49 03:05 h, 1 Stop	DB 17:11 > 20:15 03:04 h, 1 Stop	∨
139,00 €		

An example of the new display, showing the train type:

DB 07:44 > 10:58 03:14 h, 1 Stop 	DB 17:11 > 20:15 03:04 h, 1 Stop 	∧
132,05 €		

III. Mobile Ticket As Standard Option

Functionality Area: Rail Booking
New Functionality: Ticket Type Selection

Description:

Due to the higher number of mobile rail tickets used, this ticket type will now be offered as standard option and preselected during the booking. Users that decide during the booking for a mobile ticket will receive, supplementary, also the online ticket, which can be printed out, if needed. The mobile ticket can also be downloaded from the order, it can be opened from the confirmation e-mail or it can be displayed in onesto2go.

HOTEL

IV. Price Limits Extensions For Hotel

Functionality Area: Hotel Steering

New Functionality: Extension Maximum And Minimum Price Limits Hotels

Description:

The maximum price limit for hotels can now be set in a more sophisticated manner. Supplementary to the settings in the areas like hotel position, rate type and period, the maximum price limits can now also be defined, depending on the received breakfast service.

It is also possible to define now a minimum price limit. Herewith, low class hotels, which are not wanted in the business travel area can now be filtered out.
