GENERAL

I. Reduced Distance When Printing The Travel Expense Report

Functionality Area	Travel Expense Report	
New Functionality	Reduced Distance	

Description:

Via this setting, the space between the single lines will be reduced. In this way, the printout will look more compact. This helps to save paper, when printing the travel expense reports.

GENERAL

II. „Travel Policy Deviation“ Report Extension

Functionality Area	Reports / Statistics	
New Functionality	„Travel Policy Deviation“ Report Extension	

Description:

The standard report „Travel Policy Deviation“ is now extended by two columns, so that also the minimum and the maximum price of the corresponding request will be displayed, in order to allow a better comparison.

GENERAL

III. Default Line Manager In Guest Profile

Functionality Area	Create Profile	
New Functionality	Default Line Manager In Guest Profile	

Description:

When a user creates a guest profile, the line manager of the creator's profile will be automatically set as „Default Line Manager“ for the new created profile. In case there is no line manager saved, the guest profile cannot be saved and an error message will appear.

GENERAL

IV. XML Order Data Export Extension

Functionality Area	XML Export
New Functionality	XML Order Data Export Extension

Description:

The XML Order Data Export was extended by some other fields.

The following information is now also available:

- Flight fare and type
- CO2 Output
- Hotel rate type
- Travel Policy Status
- Reason for the deviation from the travel policy
- ISOS Booking transmission
- Approval information

In the onesto XML Data Export documentation you will find further details to the above mentioned fields. This documentation can be placed at your disposal by your onesto contact person.

GENERAL

V. Usage Of Variables In The Notification Management E-mails

Functionality Area	Notification Management
New Functionality	Usage Of Variables In E-Mails

Description:

It is now possible to use the existing variables in the e-mail transmission of the notification management module.

GENERAL

VI. Reason For Ordering In The Travel Agency

Functionality Area	Travel Agency Order	
New Functionality	Reason For An Offline Order Instead Of An Online Booking	

Description:

This new functionality allows the user to enter a reason in onesto, when placing an offline order instead of performing an online booking:

Reason for offline booking

Müller, Walter: Seminar (01073990)

Please enter reason for offline booking.

Reason:

Close window Save

In case this functionality is active, the reason will appear on the onesto itinerary.

The reasons can also be displayed for analysis in a statistic.

For more details hereto, please turn to your onesto contact person.

GENERAL

VII. Galileo Version Upgrade

Functionality Area	General
New Functionality	Galileo Version Upgrade

Description:

Starting with the new release, the previously used Galileo version will be upgraded to the most actual version, v18.1.

FLIGHT

I. Travel Management Business Class (1/2)

Functionality Area	Flight Booking	
New Functionality	Journey's Duration Consideration	

Description:

Starting with this release, it is possible to define if business class is allowed, depending on the trip duration.

The journey duration in days between the outbound flight and the inbound flight will be considered (the time between the arrival on a certain date at the destination and the departure of the flight back from the destination). The corresponding flight offer will get a green / yellow traffic light, if it will be travelled during the journey duration. In case the defined journey duration will be exceeded, the actually defined traffic light settings will apply.

In this example, Business class is allowed for a stay duration of max. 10 days for a journey, according to the settings.

Therefore, the user gets for a journey duration of one week also green and yellow traffic lights:

Itinerary details: Munich | MUC - Bangkok | BKK -> Bangkok | BKK - Munich | MUC

Outbound : Return : Journey with luggage

<input checked="" type="checkbox"/>	<input type="button" value="Time"/>	<input type="button" value="Origin"/>	<input type="button" value="Duration"/>	<input type="button" value="Price"/>		<input type="button" value="Select"/>

FLIGHT

I. Travel Management Business Class (2/2)

Functionality Area	Flight Booking	
New Functionality	Journey's Duration Consideration	

In case the journey duration exceeds the 10 days, all flight results in the business class will get the red traffic light:

Itinerary details: Munich | MUC - Bangkok | BKK -> Bangkok | BKK - Munich | MUC

FLIGHT

II. Lufthansa Miles & More - Miles Award Process Adaptation

Functionality Area	Flight Booking
New Functionality	Miles Award Process Adaptation

Description:

Lufthansa changed the miles awards for Miles&More, therefore an adaptation for the calculation in onesto was implemented.

Extract from the information notice of LH:

Lufthansa, Austrian Airlines, Brussels Airlines, Eurowings and SWISS implement a revenue based system for the calculation of the premium miles of the flight bookings. For flights, booked after the 12th of March 2018, the flight price will be considered as basis for the calculation.

For you as Miles & More participant, this means: Flight price (Ticket price + extra charges of the partner airlines) * 4 = Number of collected premium miles. If you paid for instance a flight price of 500 EUR, this will be multiplied by factor 4 and you will receive 2.000 premium miles for your flight.

For detailed information hereto, please see the Lufthansa website.

FLIGHT

IV. Flight Selection Tick

Functionality Area	Flight Booking	
New Functionality	Flight Selection Tick	

Description:

In the flight result list, the user can mark one or more flights with a tick, in order to print them out or to send them per e-mail later on.

After selecting a flight, displaying the details and afterwards looking up again the flight result list, the marked flight will keep its tick. This can be changed easier later on.

Search > Results > Fare details > Flight details > Confirmation Messages

ONESTO2GO

I. onesto2go Extensions

Functionality Area	onesto2go	
New Functionality	Additional Bookings And Journey's Reason	

Description:

onesto2go offers now the possibility to add supplementary bookings to existing orders. When selecting a mean of transport, an existing order can be selected. The onesto2go booking will be created separately, as previously, and then added to the selected order. On top of this, the standard reason of the order, „onesto2go“ can now be changed during the booking, so that an easier search and sorting in onesto Customer will be reached.

ONESTO2GO

II. onesto2go Hotel Details Display In The Rates Overview

Functionality Area

onesto2go

New Functionality

Hotel Details Display In The Rates Overview

Description:

For hotel bookings in onesto2go, the hotel details of the selected hotel will be displayed in the rate overview.

ONESTO2GO

III. onesto2go Flight And Rail Booking Search By Arrival Or Departure

Functionality Area	onesto2go	
New Functionality	Flight And Rail Booking Search By Arrival Or Departure	

Description:

For flight and rail bookings in onesto2go, it is now possible to search by arrival or by departure.

ONESTO2GO

IV. onesto2go Improved Display For Rail Requests Without Price Information

Functionality Area	Rail Booking	
New Functionality	Improved Display For Rail Requests Without Price Information	

Description:

For rail bookings in onesto2go, where the rail connections do not include a price information, they will be directly shown with the message: „No price information possible“.

In case the user selects such a connection, the following advice will be shown:
